PROFESSIONAL SUMMARY

Front-End Developer with 2+ years of experience specializing in Angular, React, and WebSocket. Skilled in building responsive and dynamic web applications with a strong focus on real-time data synchronization, Material-UI, and custom CSS. Experienced in personal finance and wealth management domains, adept at gathering requirements, designing effective solutions, and delivering high-quality applications. Proficient in integrating REST APIs and writing clean, structured code. Committed to creating secure, scalable applications and continuously enhancing technical expertise while collaborating in cross-functional teams.

TECHNICAL SKILLS

Backend: NestJS, WebSocket, REST APIs

Frontend: HTML5, CSS, JavaScript, Angular, React, Material-UI

Database: PostgreSQL

Tools: Git, Figma, Azure

Others: Responsive design, Cross-browser compatibility, Custom CSS

PROFESSIONAL EXPERIENCE

Atrina Technology

Software Engineer

Mumbai, India
Nov 2022 - Present

- Designed and implemented secure RESTful APIs using ASP.NET Web API with token-based authentication.
- Built cutting-edge front-end applications with Angular and React
- Implemented real-time features through WebSocket integration
- Developed web apps using Angular (13/16), RxJS, Material Design, and NgRx with reusable components and optimized performance.
- Created dynamic forms with Reactive Forms and integrated WebSockets for real-time updates.
- Ensured code quality with Jasmine/Karma for Angular testing.
- Handled error management with RxJS operators and implemented responsive UI with cross-browser compatibility.
- Collaborated via Azure DevOps for sprint planning, task tracking, and on-time delivery.

3 Minds Digital (3MD)

Full-Stack Developer (Intern)

Mumbai, India
Aug 2022 - Nov 2022

- Assisted in building and maintaining full-stack applications.
- Successfully identified, diagnosed, and fixed the existing website problems.
- Enhanced working relationships by participating in team-building activities.

EDUCATION & QUALIFICATION

Bachelor of Science in Information Technology

Thakur college of science and commerce

Mumbai, India
Jun 2018 - May 2021

TryCatch Institute

Full Stack Developer Certification

Mumbai, India
Jun 2021 - May 2022

HSC

Adarsh Education Society (Kapol High School & Jr. College)

Mumbai, India
Jun 2016 - May 2018

PROJECTS

1. Callback Request

Technologies Used: Angular, Node.js, and SQL, Socket.IO

Merged Priority List and Callback Request pages into a single tabbed interface (Active, Resolved, Unresponsive) for the CS department. Enabled real-time updates using Socket.IO and implemented interactive features like sorting, filtering, and call logging with validations. Added export functionality for Excel reports and enhanced UX with hover effects and clipboard copy for client details.

Responsibilities:

- Designed a user-friendly UI with intuitive navigation and hover effects.
- Implemented frontend validations for accurate data input and display.
- Integrated WebSocket APIs to enable real-time data synchronization.
- Structured data dynamically in Angular components with reusable services.
- Developed an Excel export feature for comprehensive report generation.

2. EOS (Enterprise Operating System)

Technologies Used: Angular, ASP.NET Core, C# and SQL

The EOS is a web-based solution that integrates key functions of 1Finance's operations, providing separate dashboards for stakeholders like Financial Concierges, Advisors, and Member Success teams. It enables Financial Concierges to collect user financial data, analyze insights, and offer tailored recommendations to improve wealth management based on each user's "money sign," a trait representing their financial personality.

Responsibilities:

- Designed the entire UI with intuitive navigation and frontend validations. Utilized Apollo Angular (GraphQL)
- in Angular to efficiently read and write data for seamless data management. Creating Web APIs, Database
- handling and maintaining the project throughout.
