ONIDA- Mirc Electronics Limited. Wada, Maharashtra  
Approving finished products involves confirming specifications performing visuals and required tests in accordance with FQA documents and ensuring all testing is to the highest standards.

# Project

---

## Milk Product Services-

**Period** : February 2023 – March 2023

**Technologies**: J2EE, HTML, Bootstrap, ReactJs, Hibernate, Spring Boot

**Description**: Milk products are quite popular these days. Most people very rarely get the best products. They have trouble finding the suitable Milkmen in their locality. Connecting and Managing Local Milkmen in different places to help growing their businesses. This benefits Milkmen and consumer by giving them a platform where they interact and meet their demands. So, Milkmen will have access to new markets and consumer will get the high-quality products

## Power Harvesting by using Solar Panels, Dynamo Wind Mill, Piezo Electric Plates for Railway System-

**Period**: January 2017 – June 2017

**Project Type**: Electronic Circuit Design

**Description**: In this project, we have used solar panels, a dynamo wind mill, and piezoelectric plates for creating electricity. We made a small train as a model. where we installed solar panels on the train roof, a small windmill between two coaches, and piezoelectric plates on the platform. We used energy generated from renewable sources in railway and also on platform.

## Declaration

---

I hereby declare that the above written particulars are true to the best of my knowledge and belief.
