### EXPERIENCE

#### SOFTWARE DEVELOPER

June 2022 - Present | Tudip Technologies Pvt Limited, Pune

##### #1 Advanta Samridhi [UPL Limited] [ India ]

- Crafted an intuitive frontend interface for a loyalty rewards and product management platform, enhancing distributor and retailer engagement and optimizing product transactions
- Built and optimized features for reward redemption, product tracking, and scanned product data visualization
- Integrated backend APIs for Season Management, Operational Area, and Product Management, ensuring smooth data flow and responsiveness
- Planned and executed role-based access control, tailoring functionalities for users and admins
- Executed data export and report generation functionalities, allowing users to download and analyze key business metrics efficiently

##### #2 Distributor 360 [UPL Limited] [ India, Turkey, Mexico ]

- Improved a data-driven analytical dashboard to visualize sales activity using bar charts, pie charts, donut charts, and tables
- Created a multilingual web application to track and analyze distributor sales data across multiple countries for UPL
- Built the application from scratch, ensuring a seamless and interactive user experience
- Enforced dynamic charting to display key sales metrics such as revenue, margin, product returns, and sales per product
- Established a role-based dashboard, displaying relevant sales, revenue, and return data based on user roles

##### #3 Upulse [UPL Limited] [ Global ]

- Architected a Business Intelligence web application for UPL's Chairman and Group CEO, delivering real-time insights into global sales, returns, and overdue data
- Applied dynamic data visualization to showcase Top 3 countries and Top 3 customers across sales, returns, and collections using real-time analytics
- Developed and integrated interactive charts and graphs to display week-wise, month-wise, and year-wise overdue trends, enhancing data-driven decision-making
- Optimized frontend performance and UI/UX for a seamless, responsive experience
- Collaborated with backend teams to fetch and display real-time data via REST APIs / GraphQL, ensuring smooth data flow and integration

##### #4 Legal AI [UPL Limited] [ India, Europe ]

- Enhanced a Legal AI-powered chatbot interface to assist users in managing and understanding legal documents
  - Designed an interactive UI with a thread-based conversation system, allowing users to navigate and retrieve legal insights efficiently
  - Integrated real-time search functionality, enabling users to query legal terms and receive instant AI-driven responses
  - Implemented multi-region support, allowing users to access legal documentation based on geographical and organizational preferences
-

## AWARD

### #1 Rocking Debut Award In 2023

- Awarded for exceptional performance and remarkable contributions, this is a recognition of outstanding achievement and a commitment to excellence

### #2 Sincere Rockstar Award In 2024

- This recognition is a testament to the hard work, dedication, and unwavering commitment

## EDUCATION

BACHELOR OF ENGINEERING (CSE)

TGPCET, Nagpur, Maharashtra | Graduated in 2021

## CERTIFICATIONS

ANGULAR DEVELOPER

Kiran Academy, Pune, Maharashtra, India
