Professional Summary

Frontend Developer with **4+ years** of experience in building scalable, high-performance web applications. Proficient in React, Redux, TypeScript, and performance optimization, with a strong focus on writing clean, maintainable code and delivering seamless user experiences. Experienced in working within Agile environments, collaborating with cross-functional teams, and developing high-quality solutions that drive business impact.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML, CSS, SCSS.

Frameworks: React.js, Next.js, Redux, React Query, Material-UI, Tailwind CSS, Bootstrap, Jest, React Testing Library, Zustand.

Developer Tools: Git, GitHub, VS Code, Chrome DevTools, Webpack, Babel, ESLint, Prettier, Vite, Parcel

Libraries: Lodash, Axios, Framer Motion, Highchart.js, D3.js, date-fns.

Experience

React Developer

Frigma Data Systems Pvt Ltd (@Mashreq Bank)

Jan 2022 – Present

Bengaluru, Karnataka.

- Developed dynamic and responsive frontend interfaces using React.js, enhancing user experience and ensuring seamless interactions.
- Built a rich, interactive **banking application** for Relationship Managers, streamlining customer interactions and **reducing transaction processing time by 30%**.
- Converted Figma design journeys into fully functional frontend websites, ensuring pixel-perfect implementation and adherence to design specifications.
- Developed an **FI Bene Dashboard** for FI Bene RM, RH, and UM to track deals, contributing to **AED 8M+ in business revenue**, and integrated **Qlik for 50% faster data visualization**.
- Optimized the **deal tracker page** by shifting data-fetching to the back end, **reducing page load time by 60%** and improving performance.
- Integrated Qlik graphs into React applications, enhancing data representation efficiency by 35%.
- Code Quality Improvement: Worked across multiple micro-frontends, increasing test coverage from 30% to nearly 90%, resolving Sonar issues, and **reducing code duplication by 5%** for better maintainability.
- Experience with CI/CD pipelines and MS Azure DevOps, including running pipelines and deploying code.
- Integrated APIs developed using Node.js by backend developers, ensuring efficient data flow and seamless frontend-backend communication.
- Leveraged modern JavaScript (ES6+) features to write clean, efficient, and maintainable code.
- Actively participated in **code reviews**, improving best practices and reducing bugs by **30%**.
- **Project Management:** Ensured timely project delivery, meeting **100% of deadlines** while effectively managing priorities.
- Proficiency in Front-End Technologies: Strong expertise in JavaScript, React.js, TypeScript, Redux, and related libraries.

Frontend Developer

Freelancer

Dec 2021 – Jan 2022

Bengaluru, Karnataka.

- Developed **responsive UIs** for **mobile applications and web apps**, ensuring seamless user experiences across devices.
- Implemented reusable and maintainable components, leveraging React's component-based architecture for efficiency.
- Ensured application quality through automated testing with Jest and continuous integration workflows using GitHub.
- Continuously **reviewed and refactored code** to enhance **maintainability and quality**, and performed **end-to-end unit testing** of features and functionality.

Professional Projects

PULSE @Mashreq Bank

| *Typescript, JavaScript, React JS, Redux, SCSS, Material UI*

Jan 2022 – Present

- Pulse is an internal application for Relationship Managers (RMs) and Unit Managers (UMs) of the bank, enabling them to perform day-to-day activities such as creating deals, tracking revenue, logging call reports, and managing clients and potential deals.
- Implemented an intelligent search feature, similar to Google Smart Search, providing real-time suggestions based on user input, enhancing search efficiency and user experience.
- Integrated Qlik with the React application, utilizing JavaScript for module loading and dependency management, ensuring seamless data visualization and interactive dashboards within the app.

Advanced Analytics @Mashreq Bank

| *Typescript, JavaScript, React JS, Redux, Highchart, CRM*

April 2023– Present

Worked on five dashboards to enhance deal tracking, prospect management, FX product analysis, beneficiary management, and marketing campaigns.

- **Pipeline Dashboard** – Allows **RMs/UMs** to create deals, track their status, and manage **accepted, rejected, and snoozed deals**.
- **Reach Dashboard** – Enables **RMs/UMs** to handle prospects by **accepting, rejecting, or referring them** to another RM/UM across units and divisions.
- **FX Dashboard** – Displays FX product details using High-charts, a tabular format, and Excel export functionality.
- **FI Bene Dashboard** – Provides beneficiary details in a tabular format, allowing RMs/UMs to accept, book, reject, or reactivate a beneficiary.
- **Marketing Campaign Dashboard** – Enables RMs/UMs to create campaigns, track progress through a three-stage progress bar (Email Sent → Email Opened → Accepted by Customer), integrate Qlik for visualization, and download campaign details in PDF format.

PACE @Mashreq Bank

| *Typescript, React JS, Storybook*

March 2023– Present

- PACE is a common component library developed for internal use at Mashreq Bank.
- The purpose of this product is to standardize the UI by creating a unified component library for the bank.

Personal Projects

Build a Course and LMS Platform

| *React, Next.js 13, Stripe, Mux, Prisma, Tailwind CSS, MySQL*

- Developed a learning platform where users can create, manage, and enroll in courses.
- Integrated Stripe for payments and Mux for video streaming to handle course purchases and playback.
- Used Prisma with MySQL for database management and built a dashboard for instructors to manage courses.
- Designed a responsive and user-friendly UI with Tailwind CSS for a smooth experience.
- Implemented search, filtering, and authentication for easy navigation and secure access.

AI Chat App Using DeepSeek API & Next.js

| *React, Next.js 13, MongoDB Atlas, Mongoose, Clerk, Tailwind CSS, DeepSeek API*

- Developed & deployed a Full Stack DeepSeek AI Clone using Next.js, integrating Clerk for user authentication and MongoDB Atlas for database management. Implemented Clerk webhooks to store user data upon account creation.
- Integrated **DeepSeek API** to process AI-generated responses, storing chat history in the database for easy access via the sidebar. Successfully deployed the application on **Vercel**, making it accessible via a live project link.

EDUCATION

Driems, BPUT University

Bachelor Of Technology

Cuttack, Odisha

June. 2013 – June 2017

SOFT SKILLS

- Strong **problem-solving** and **analytical thinking**, ensuring efficient and optimized web solutions.
- Effective **communication** and **teamwork**, collaborating with cross-functional teams and mentoring juniors.
- Adaptable to **new technologies** and **Agile methodologies**, delivering high-quality solutions under tight deadlines.
- Strong attention to detail with a user-centric approach.
