SUMMARY

As a dedicated software engineer at Fujitsu, I specialize in building high-quality scalable web and server-side applications using modern technologies such as Html, CSS, JavaScript, Java, React.js and Node.js frameworks. My experience includes working in fast-paced Agile environments and developing efficient solutions that enhance user experience and optimize processes. I take pride in my ability to deliver impactful results.

EXPERIENCE

Technical Service Trainee(System Engineer)

Fujitsu Consulting India Private Limited

B.E (Computer Engg.)

Universal College Of Engineering And Research

📅 08/2017 - 08/2020 📍 Pune

Diploma (Computer Engg.)

MM Polytechnic

📅 06/2014 - 06/2017 📍 Pune

S.S.C(10th)

New English School Vinhere

📅 06/2009 - 03/2014 📍 Mahad

KEY ACHIEVEMENTS

Star of the Quarter Award

Star of the Quarter Award from Fujitsu.

Star of the Month Award

Star of the Month Award from Fujitsu.

Client Appreciation

Client appreciation for completing work before time

PROJECTS

Statement Generation Module

Statement Generation Module

- Developed a statement generation platform for bank branches, with Single Sign-On (SSO) integration.
- Provided output in multiple formats: on-screen, PDF, Excel, printer, and sent PDF via email.
- Fetched data from live and archival databases, allowing users to combine date ranges.
- Developed this application for Deposit, Loan and BGL(Bank) accounts.

Average Balance Service

Average Balance Service

- Developed a service to display the average balance for 6 and 12 months for deposit accounts only.
- Optimized the process for retrieving and calculating the average balance to improve user experience.
- Integrated with banking systems to provide accurate and real-time balance information for users.
