

Vishal Raj

Bangalore, Karnataka | vraj79034@gmail.com | 7903467310 | linkedin.com/in/vraj79 | github.com/vraj79

Professional Summary:

- 2+ years of experience in the Web Development using HTML, CSS and JavaScript,
- Expertise in developing web apps in various JavaScript frameworks like ReactJs, NextJs NodeJs, ExpressJs.
- Worked on CSS Background, CSS Positioning, CSS Text, CSS Border, CSS Margin, CSS Padding, CSS Table, Pseudo Classes, Pseudo Elements and CSS Behaviors in CSS.
- Experience in CSS pixel-level layout, Consistency with browsers, Version, and Platform Independence.
- Involved in designing the user experience interface UI/UX strategy, UI requirements, and converting findings into UI designs.
- Strong experience in backend development with Node.js and Express.js, creating secure, efficient, and scalable server-side architectures.
- Used NodeJs and ReactJs MVC architecture for developing the Single Page Application (SPA).
- Ability to write clear, well-documented, well-commented, and efficient code for web development
- Strong problem-solving, organizing, communication, and planning skills, with the ability to work in a team environment.
- Good written and oral communication skills and Interpersonal skills with a strong ability to excel through collaboration with team members.

Skills:

Web technologies	HTML, CSS, Tailwind, SCSS, Bootstrap, MaterialUI, AntDesign
JavaScript libraries and Frameworks	ReactJs, NextJs, Redux, NodeJs, ExpressJs, Jest(Unit Testing)
Programming Languages	JavaScript, TypeScript
Databases	MySQL, PostgreSQL, MongoDB
Tools	Github, Netlify, Vercel, GraphQL, Firebase, GCP,AWS, Postman, Jira

Experience:

React Developer , Andersenlab (Sunhive Solutions Pvt Ltd) – Bangalore	Jan 2025 – Present
• Developed and maintained a currency conversion and exchange rate module, allowing users to view real-time conversion rates and perform secure multi-currency transactions efficiently. This helped improve customer experience for international users and travelers. • Designed and implemented a secure and user-friendly Admin Panel to manage internal operations such as employee records, customer financial deposits, and card products. The panel allowed authorized users to perform CRUD operations with role-based access control. • Integrated Google Two-Factor Authentication (2FA) for enhanced security in the back-office employee login system. This helped enforce multi-layered authentication and ensure only verified employees could access sensitive banking data. • Wrote comprehensive unit tests using Jest, achieving high test coverage for key functionalities. This ensured code stability, minimized bugs, and allowed faster iterations during feature development. • Wrote comprehensive unit tests using Jest, achieving high test coverage for key functionalities. This ensured code stability, minimized bugs, and allowed faster iterations during feature development. • Built a responsive and interactive carousel component to display the latest banking offers, discounts, and promotional products on the home screen. The carousel adapted to all screen sizes, enhancing user engagement on both desktop and mobile. • Utilized Material UI to design a clean and modern responsive layout, ensuring consistent design standards across the application. MUI components were customized to align with the bank's branding and UI guidelines.	

- Implemented real-time data fetching and display for exchange rates and product updates using APIs, ensuring that both admin and user interfaces stayed up to date without manual refresh.
- Optimized performance across all devices, focusing on responsive design principles and lightweight components to reduce loading time and improve user experience.
- Collaborated closely with backend and DevOps teams, ensuring smooth integration between frontend interfaces and banking APIs, and participated in CI/CD processes for regular feature deployment.

Software Engineer, WarpDrive Tech Works (SHAREPOINT SHOP) – Bangalore

Sep 2023 – Dec 2024

- Developed a fully responsive website using NextJs, ReactJs, Javascript and Tailwind CSS, ensuring seamless user experience across different services.
- Experience working with Slack APIs to implement custom messaging solutions.
- Integrated Google Calendar APIs for slot booking and appointment scheduling.
- Worked with Google Mail APIs to automate email-triggering functionalities.
- Proficient in deploying serverless solutions using Google Cloud Functions, ensuring efficient and scalable backend operations.
- Developed an applicant management system akin to an HRMS tool, streamlining recruitment workflows and candidate tracking.
- Created an internal Jira-like tool for efficient project management and task tracking.
- Built a Salesforce-like CRM system, optimizing lead-to-opportunity conversion processes.
- Analyze application performance issues and optimize them for both speed and scalability.
- Utilize modern techniques like lazy loading, code splitting, and efficient state management to improve client side performance.
- Frontend Development: Leveraged React.js and Next.js for building user interfaces.
- State Management: Used Redux for managing application state.
- Database Management: Designed and implemented database tables and schemas.Used AWS RDS for managed relational databases.
- Database Operations: Utilized PostgreSQL and MongoDB for backend data management.
- Data Fetching: Leveraged GraphQL queries for efficient data retrieval.
- Serverless Operations: Used Google Cloud Functions.
- Reporting: Created and customized reports using Looker Studio.
- Time Logs Tracking: Integrated DayPilot Scheduler for logging user activity on specific days.
- Google API Integration: Created calendar events and automated email notifications.
- Custom Messaging: Utilized Slack APIs for tailored communication.
- Performance Optimization: Improved data loading and implemented efficient exporting of large datasets.
- Data Presentation: Integrated AG Grid for advanced data manipulation and display.
