PROFESSIONAL SUMMARY

I am a results-driven **Full Stack Developer** with over **2+ Years** of experience specializing in building scalable web applications. My expertise lies in **JavaScript, TypeScript, and various frameworks** including React.js, React-Native and Node.js. I have a solid foundation in **Data Structures and Algorithms**, enabling me to deliver efficient and maintainable solutions. I am passionate about crafting **seamless user experiences and continuously improving performance**.

SKILLS

JavaScript	TypeScript	HTML	CSS	React.js	React Native	Next.js	Angular	Node.js	
Express.js	Bootstrap	jQuery	WordPress	Strapi	Firebase	MongoDB	C++	Git	Jira
GraphQL	REST API	Figma	Xampp	HubSpot	Selenium	Load Testing(K6)			
API Testing (Postman)		Data Structures & Algorithms							

EXPERIENCE

Frontend Developer

Win Home Inspection

02/2023 - Present Noida, Uttar Pradesh

Leading home inspection franchise in the USA with a nationwide presence and a multi-million-dollar revenue model

- Spearheaded the front-end development and optimization** of **Wini.com**, leveraging **React.js, Next.js, JavaScript, and Node.js**, resulting in a **30% increase in online conversions** and **enhanced SEO performance**, securing **WIN Home Inspection's position as the #1 home inspection franchise in the USA**.
- Architected and deployed WINSpect**, a **cutting-edge web and mobile platform** that streamlined home inspection order scheduling, reducing processing time by **40%** and contributing to a **20% revenue boost**. (Tech Stack: Angular, JavaScript, Bootstrap, Testing Tools).
- Led the design, development, and deployment** of **WIN Franchise**, an **ad-driven revenue platform**, using **WordPress, JavaScript, and React.js**, enhancing **franchise recruitment and revenue diversification**, directly impacting business expansion.
- Developed an automated monthly newsletter** using **HubSpot, React.js, JavaScript, and Tailwind CSS**, increasing **client engagement by 40%** and strengthening customer retention strategies.
- Optimized front-end performance**, implementing **advanced caching, lazy loading, and code splitting techniques**, reducing page load time by **35%**, improving **user experience**, and boosting customer retention.
- Contributed significantly to WIN Home Inspection's revenue growth**, helping the company scale to **\$57.6M in annual revenue** and increasing **revenue per employee to \$170K** through **strategic development and performance-driven solutions**.

Teaching Assistant

Coding Ninja

11/2022 - 03/2023 Noida, Uttar Pradesh

One of India's top ed-tech platforms specializing in programming and software development

- Provided mentorship and hands-on training** to **500+ students** in **Data Structures, Algorithms, JavaScript, React.js, and Full-Stack Development**, improving **project efficiency and coding best practices**.
- Resolved over 700+ complex technical queries**, offering **code optimization techniques, debugging support, and project guidance**, improving **students' problem-solving skills and technical acumen**.
- Supervised and provided technical mentorship** for projects like **Amazon Web Clone, To-Do List, and Contact Manager**, ensuring high-quality code, performance optimization, and industry standards.
- Enhanced student engagement and learning outcomes** through structured **code review sessions, one-on-one mentorship, and project-based learning**, accelerating **students' transition into professional software development roles**.

PROJECTS

E-commerce Website

A full-stack eCommerce solution designed to provide a secure, user-friendly shopping experience with seamless performance across devices.

- **Technologies Used:** React.js, Node.js, MongoDB, Stripe (for payment processing).
- Developed a **secure checkout** process and integrated **payment gateways** for safe transactions, ensuring a smooth purchasing experience for users.
- Implemented essential features such as **product search, filtering, and pagination** to enhance the user interface and improve usability.
- Optimized the platform for **scalability**, ensuring high availability and performance during peak shopping seasons and high traffic volumes.
- Integrated an **order tracking system**, providing customers with real-time updates on their purchases.

Product Listing Platform

A dynamic web application designed for managing and displaying a large inventory of products efficiently, aimed at improving data management and user experience.

- **Technologies Used:** Angular, Node.js, MongoDB.
- Developed a robust **pagination system** for browsing products, with additional features like **CSV export** to streamline data handling for admins.
- Implemented **automated data refresh** every 5 minutes, ensuring that product listings remain up-to-date and reflective of real-time changes.
- Designed intuitive **data manipulation tools**, enabling administrators to manage, update, and categorize products with ease.
- Optimized for **responsive design**, ensuring usability across all devices and screen sizes.

Movie Website

A movie information website that allows users to search, view, and filter movies based on various criteria like genre, release year, and rating.

- **Technologies Used:** React.js, Node.js, API integration (The Movie DB API), Express.js.
- Developed a **search and filter functionality**, allowing users to search movies by title, genre, and rating, improving the overall user experience.
- Implemented **responsive design** to ensure accessibility across mobile and desktop platforms.
- Focused on **performance optimization**, including lazy loading and code splitting to ensure quick loading times even with large datasets.
- Created a **favorites system**, where users can save movies to their personalized list for easy access later.

EDUCATION

B.Tech - Computer Science and Engineering

Dr. A.P.J. Abdul Kalam University

08/2019 - 05/2023 Lucknow, Uttar Pradesh

KEY ACHIEVEMENTS

 Effective Student Mentorship Mentored 500+ students, enhancing their coding skills and best practices rapidly.	 Conversion Rate Growth Increased online conversion rates by 30% through strategic front-end optimization.
 Process Efficiency Improvement Decreased order scheduling processing time by 40% with new web platform.	 Technical Problem Resolution Resolved 700+ complex technical queries, boosting student problem-solving skills.
