

SUMMARY

Detail-oriented Software Developer with 4+ years of experience specializing in front-end development using Angular and providing application support in cybersecurity-focused product environments. Skilled in building scalable web applications, state management using BehaviorSubject, and optimizing system performance.

Proven expertise in Privileged Access Management (PAM), Supply Chain Management (SCM), and Enterprise Performance Management (EPM). Adept at troubleshooting, mentoring, and collaborating with cross-functional teams to deliver high-quality software solutions

EDUCATION

Rammninjan Jhunjhunwala College

Bachelor of Science in Information Technology
Completed in 2020

SKILLS

- Frontend Development: Angular (v9, v14), , TypeScript, JavaScript, HTML5, CSS3
- UI Frameworks: Angular Material, Bootstrap
- Testing & Debugging: Jasmine, Karma, Chrome DevTools
- Performance Optimization: AOT, Lazy Loading, RxJS, Change Detection
- Tools: Git, Docker, Figma, Postman
- Collaboration: Agile/Scrum, Cross-Functional Teamwork, Mentorship
- Security Tools & Technologies:
- PAM (Privileged Access Management), SCM (Supply Chain Management), EPM (Enterprise Performance Management), Arcos
- Database Security: SQL Server, MySQL,
- Windows Server, Linux
- Web Servers & Networking:
- IIS (Internet Information Services)
- Load Balancer Configuration (HAProxy, Nginx)
- Firewalls, VPNs, SSL/TLS, SSH, SFTP
- Client Support & Troubleshooting
- Collaboration with Cross-Functional Teams
- Problem Solving & Attention to Detail
- Communication & Reporting

PROFESSIONAL EXPERIENCE

Software Developer

22 July 2022 - Present

- Designed and developed scalable web applications using Angular (v9 & v14), enhancing performance and user experience.
- Optimized page load speeds by implementing lazy loading and AOT compilation, reducing load times by 25%.
- Built reusable Angular components, streamlining development efforts and improving maintainability by 30%.
- Collaborated with UI/UX designers to implement pixel-perfect, responsive, and accessible user interfaces.
- Mentored junior developers on Angular best practices, state management, and debugging techniques.
- Contributed to R&D and development of 5+ new product features.
- Provided application support, troubleshooting issues, and optimizing system performance for seamless user experience.

Associate Application Support

16 November 2021 – 22 July 2022

- Security Management: Led security configurations and management for PAM, SCM, and EPM products, ensuring secure access to critical systems and data.
- Diagnosed and resolved technical issues by analyzing logs, troubleshooting software applications, and identifying solutions.
- Implemented and supported Privileged Access Management (PAM) solutions, including ARCOs PIM software, ensuring secure application, database, and gateway connections.
- Provided end-user support, addressing technical issues, troubleshooting errors, and resolving application functionality queries.
- Executed PIM disaster recovery drills, performed version upgrades, and managed SQL database migrations.
- Collaborated with cross-functional teams to resolve customer issues and maintain up-to-date information in customer databases.

CERTIFICATIONS

- Certified Arcon | PAM Associate
- Certified Arcon | PAM Administrator
- Certified Arcon | PAM Prefessional

- Conducted UAT (User Acceptance Testing) and production upgrades across multiple product versions.
- Tested new application versions in internal environments, identified and reported bugs, and validated patches before deployment.
- Implemented privileged credential management, user authentication/authorization, policy enforcement, session brokering/recording, external integrations, workflows, auditing, and reporting.

Arcon Tech Solutions | Internship

31 May 2021 - 16 November 2021

- Led security configurations and management for PAM, SCM, and EPM products, ensuring secure access to critical systems and data.
- Provided end-to-end security support for clients, including troubleshooting issues related to security configurations, access controls, and system performance
- Tracking and monitoring the EPM Account Users.
