Professional Summary

Dynamic and performance-focused Front-End Developer with 3+ years of experience in designing and developing scalable, high-performance UI architectures. Proficient in React.js, Redux, TypeScript, and PrimeReact and SQL, with expertise in building responsive, user-centric web applications. Skilled in optimizing database performance, writing efficient SQL queries, and managing complex database systems to ensure seamless, data integration and high system efficiency experienced in Agile environments and recognized for problem-solving abilities.

Work Experience

SLK Software Pvt. Ltd. [Avo Automation] (Product Development Engineer) | Nov 2021 – Present

UI/UX Optimization & Front-End Performance:

- Developed highly responsive, visually engaging interfaces using React.js, PrimeReact, Ant Design, and **Material-UI, resulting in a 30% reduction in load times through lazy loading, code splitting, and optimized state management.**
- Enhanced cross-device and cross-browser compatibility with HTML, CSS, and modern grid systems, ensuring a 25% increase in responsiveness and usability.

Efficiency and Performance Improvements:

- Implemented Redux Toolkit to reduce unnecessary re-renders by 20%, improving application efficiency and scalability .
- Used advanced React optimization techniques, including useMemo, lazy loading, and error boundaries, to minimize slowness, enhance user experience, and ensure seamless functionality.

Scalable and Reusable Component Development

- Built modular, reusable UI components with Redux, PrimeReact, and JavaScript frameworks, improving code efficiency and maintainability by 30%.
- Delivered a scalable, user-friendly UI with streamlined navigation, robust error handling, and consistent exception handling practices.

Data Visualization and Analysis:

- Developed dynamic visualization dashboards using React.js and Chart.js to display test case performance and execution reports, enhancing decision-making by 30%.

Debugging and Stability Enhancements:

- Diagnosed and resolved front-end issues using Chrome DevTools and Git , reducing bug resolution **time by 40%.**
- Collaborated with QA and back end teams to address critical issues, improving product stability and user satisfaction.

Advanced Development Practices:

- Leveraged trending frameworks, React standards , and best practices for scalable, maintainable code, ensuring faster development cycles and consistent performance.
- **Developed robust Execution features (running test step groups based on predefined test cases) achieving 90% client satisfaction by ensuring validation and detailed execution reporting.**
- **Developed Utility Data Table , simplifying data management, and created a script migration tool** that seamlessly converted non-AVO scripts in to AVO-compatible formats, praised by clients like FIS for improving test automation efficiency.

Technical Skills

- **Frontend Development** : React.js, Redux, TypeScript, JavaScript (ES6+)
- **UI Frameworks** : PrimeReact, Ant Design, Material-UI, Tailwind CSS, SCSS
- **Performance Optimization** : Lazy Loading, Code Splitting, Memoization, Error Boundaries
- **Version Control** : Git, GitHub
- **Tools, Platforms and others** : NPM, VS-Code, Postman, Azure DevOps, Figma, Agile/Scrum methodologies.
- **Testing and Debugging** : Chrome DevTools, Jest, React testing library.
- **Database Management:** SQL

Education

Canara Engineering College, Mangalore, Karnataka(CGPA-7.03) July 2016 – Sept 2020
B.E in Electronics and Communication Engineering

Achievements and Certifications

- Received **AVO Modish Team Award** (Best Team Collaboration Project).
- Received **AVO Super Squad Award** (Best Project Implementation in Folder Structure).
- Received **AVO Super Star Award** (Recognized for outstanding performance).
- JavaScript Fundamentals (Namaste Dev)
- React.js (Namaste Dev)
- Web Development and SQL (JSpider)
