EXPERIENCE

Frontend Developer

Manal IT Services

June 2023 – Present

Malegaon, MH

- Led the development of a feature-rich e-commerce platform, optimizing UI components and integrating APIs to enhance customer experience.
- Developed a dynamic dashboard for real-time analytics, enabling monitoring of user engagement and sales metrics.
- Collaborated with cross-functional teams to design and deploy responsive web applications, ensuring mobile compatibility and scalability.

Web Developer

Remote Freelance

May 2024 – Present

- Developed responsive components and ensured cross-device compatibility using HTML, CSS, and JavaScript.
- Fixed UI issues and optimized live websites for better user experience.
- Managed multiple projects with tight deadlines, demonstrating time management and problem-solving skills.

PERSONAL PROJECTS

Weather App | *React.js, OpenWeatherMap API, JavaScript, HTML/CSS* | [Link](#)

Feb. 2023 – Mar. 2023

- Increased weather awareness by developing a responsive app displaying real-time weather data for over 100+ cities, integrating OpenWeatherMap API for seamless updates (React.js, JavaScript).
- Enhanced user experience with geolocation-based auto-detection and intuitive unit conversions, achieving cross-platform compatibility and user engagement growth by 25%.

Netflix Clone | *React.js, TMDB API, JavaScript, HTML/CSS* | [Link](#)

Apr. 2023 – May 2023

- Built a Netflix-inspired web application with a responsive and sleek UI using React.js, enabling users to browse, search, and view movie details in real time by integrating the TMDB API for fetching dynamic content.
- Integrated user authentication for secure account creation and login, along with interactive movie trailers for a richer user experience, enhancing engagement and time spent on the platform.
