JABID KHAN PATTAN

Software Developer

PROFESSIONAL SUMMARY

Passionate software engineer upto 4 years experience in developing web applications. Skilled at writing clear, concise code that is easy to maintain and trouble shooting. Experienced in working with small and large teams across multiple projects and companies.

BACKEND :

- **Authentication & Authorization:** Implementing user authentication (e.g., JWT) and role-based access control (RBAC) to secure routes and define different permissions for users based on roles.
- **Middleware and Routing:** Developed custom middleware functions and implemented advanced routing techniques in Express.js to manage requests and responses efficiently.
- **Database Integration:** Integrated and managed databases like MongoDB and **Authentication and Authorization:** Implemented secure authentication and authorization mechanisms using JWT ensuring user data protection and access control.
- Implement and manage database schemas and interactions, ensuring efficient data retrieval and storage.

FRONTEND :

- Fetch data from an API or a server and dynamically populate the table rows and columns.
- Implement editable rows or cells within the table. Clicking on a row or cell can turn it into an editable input field, allowing users to update values in real-time.
- **Dynamic Data Updates:** Incorporated real-time data updates for dashboards or data-intensive components. Data is fetched and displayed as soon as changes occur, ensuring users see the most current information without manual refreshes.
- comprehensive form validation was implemented to ensure data integrity and enhance user experience.

TECHNICAL SKILLS

JavaScript | ReactJS | Angular | NodeJS | REDUX | TypeScript | ExpressJS | MySQL | MongoDB | REST APIs | Jest | Web Services

KEY SKILLS

Software Development | Code Optimization | REST APIs | User Interface Development | Responsive Design | Trouble shooting

WORK EXPERIENCE

Sr System Engineer @Teamware Solutions (TATA CONSULTANCY SERVICE PVT LTD)

Oct '24 - Present

Kurator- Upgrade (NCA)

Bangalore, India

Kurator is an internal project of News Corporation Australia

Product :

- **Kurator** is an internal web application of **News Corp Australia**, which consists of various plugins to help search for content, send App notifications, create interactives, legal kill, assign topics to articles and many more.

Roles & Responsibilities:

- I'm handling the one of the plugin of Kurator application by collecting the client requirements and specifications of the product.

- Working on ReactJS and Nodejs technologies, implimentation of kurator-lite upgrade UI and their search functionalitys based asset type and managing the dynamic drop-down renders.
- Handling the multiple dynamic input forms , validation and showing the content based the user inputs and handling the normal search and advanced search filters.
- Integrating the APIs and creating the API endpoint using NodeJs environment.
- Designed and optimized data models with MongoDB and implemented Mongoose for seamless data validation and schema modeling.
-

Provider Web App Portal

Bangalore, India

The Blue Shield of California provider web app portal is an online platform designed to streamline healthcare services for providers

- Product :**
 - healthcare services for providers. It offers a centralized interface for healthcare professionals to manage patient care.
 - Through the portal, providers can access patient eligibility, submit claims, verify coverage, and track reimbursements.
 - Eligibilit & Benefits Verification: Instantly check patient coverage.

- Roles & Responsibilities:**
 - Developed user-friendly interfaces for providers to access patient information, submit claims, and verify coverage efficiently.
 - Integrated with Blue Shield's backend systems using Node.js for seamless data retrieval, including eligibility checks, claim submission, and authorization requests.
 - Implemented role-based authentication and authorization using ReactJs and Node.js, ensuring secure access for different user types (e.g., doctors, administrators).

Systems Engineer @Infosys Pvt Ltd

Apr '22 - Dec '23

MBS Product Platform

Bangalore, India

MBS Product is a platform which helps to create web applications without writing any code.

- Product :**
 - MBS Product platform integrated with two projects Design Studio and Design Viewer it allows to user to create the web applications , Dynamic websites and complex forms etc, without writing any code.
 - We need to configure the input properties inside the Design Studio based on the requirement. User Interface will generate automatically, Design Viewer allows to test and interact with the generated UI.

- Roles & Responsibilities:**
 - API Integration with Axios and Fetch: Integrated RESTful APIs with Axios and Fetch, managing asynchronous data fetching and error handling effectively.
 - Handle both frontend and backend development tasks, ensuring seamless integration between the client and server sides of the application.
 - **Bug Fixing:** Identify, document, and resolve bugs and issues that arise during development or after deployment.
 - **Responsive Design:** Ensure websites are responsive and work across various devices and screen sizes using frameworks like Bootstrap or Tailwind CSS.

Software Engineer @Legacies Techno Pvt Ltd

Apr '21 - Jan '22

JIO OPS Portal

Bangalore, India

JIO OPS Portal is an Internal project of Reliance.

- Product :**
 - JIO OPS Portal is developed internal use purpose, it will allows to manage the customer's subscription data.
 - Worked on optimizing the network infrastructure for JIO, aiming to improve connectivity and reduce latency for millions of users.

- Roles & Responsibilities:**
 - Collaborated with team members to gathering the client requirements and the product information.

- **Forms and Validation:** Expert in building complex forms , including custom validation logic for enhanced user input handling.
- Implemented performance optimizations, such as code splitting, lazy loading, and memoization, to improve the app's efficiency.
- Used Express.js and Nodejs for efficient server-side routing and middleware handling.
- Designed and optimized data models with MongoDB and implemented Mongoose for seamless data validation and schema modeling.
- Integrated third-party services like Mailjet to extend application functionality and to communicate with real time.

Awards & Recognitions

- Received a **INSTA** award for fixing the critical bugs in the production and development environment , delivering the tasks with in the project guidelines, excellence in web development outstanding performance and contribution to the Project.

EDUCATION

Jawaharlal Nehru Technological University Hyderabad.	Jun '13 - Jun '17
Brilliant Institute of Engineering and Technology - BTECH	Hyderabad, India
