Career Summary

Frontend Engineer with 3 years of experience building performant, scalable, and accessible web applications at Reliance. Proficient in **React Js**, **React Native**, **Next Js**, **TypeScript**, and **Redux**, with a strong focus on UI/UX, design systems, and performance optimization. Successfully led features for high-traffic products including **Ajio**, **Jio Business**, and **Reliance Foundation Hospitals**. Skilled at cross-functional collaboration, scalable architecture, and delivering impact-driven solutions.

Work Experience

Software Engineer, Jio Platforms Limited

July 2022-Present

Reliance Foundation Hospitals:

- Integrated a **PDF viewer** and **glucose tracker notification system**, improving doctor-patient communication by 35% and enhancing clinical workflow.
- Implemented **patient filtering** based on assigned doctors and categorized patients into 'Concerning', 'Medium', and 'Normal' groups based on glucose ranges, improving data accessibility and clinical decision-making efficiency.
- Enabled secure patient login by allowing doctors to add/edit patient emails with validation, supporting **email-based OTP authentication** for streamlined access and onboarding.
- Added auto onboarding of patients via an Excel sheet on the doctor dashboard, improving onboarding efficiency

Jio Business:

- Designed and implemented a payment system with **real-time updates** and multiple gateways, increasing user flexibility by 40% and reducing transaction errors by 25%.
- Delivered a responsive UI, accelerating development by 30% and improving user satisfaction by 20% through a streamlined checkout experience.

Ajio:

- Developed key features such as **dynamic header**, **search bar**, **wishlist**, and **Ajio Luxe toggle**, boosting user engagement by 25% through enhanced personalization.
- Improved mobile navigation and product visibility by 40% with **SSR**, **responsive carousel**, and **video components**, increasing user retention by 20%.

Education

Xavier Institute of Engineering, BE in Information Technology

May 2018 – May 2022

- GPA: 7.87/10.0

Projects

E-Commerce Website

- Developed a feature-rich e-commerce website using **React** and **Redux**, integrating a **JSON dataset** of 200+ products and APIs for real-time updates, speeding up deployment by 25%.
- Implemented key functionalities like **cart operations**, and a dynamic **checkout system** with real-time price calculations, leading to a 15% improvement in conversion rates.

Technologies

Languages: JavaScript, TypeScript,

Frameworks/Technologies: React , React Native, Next.js, Redux, React Query, Tailwind CSS , Material UI , Bootstrap

Tools: Git, GitHub, Postman, Figma, VS Code, Android Studio

Other Skills: API Integration, Responsive Design, State Management, Test-Driven Development (TDD)

Certifications

React Basics

Meta
