WORK EXPERIENCE

Evoluzn India Private Limited

Frontend Developer | HTML5, CSS3, JavaScript, React

Oct 2022 - Present

- Developed **Industry 4.0-compliant dashboards** for **industry automation** with **JavaScript**, **Chart.js graphs**, **WebSockets**, and **MQTT** for real-time device management, **optimizing energy consumption by 30%** and streamlining operations.
- Implemented **robust JWT-based authentication** and authorization flows, interacting with **SQL databases** to **reduce unauthorized access attempts by 25%**.
- Designed and built **responsive web applications** from **Figma** prototypes, integrating **lazy loading** concepts and **Bootstrap** to **improve initial load times by 15%**; Contributed to a **large-scale public-facing application** by **integrating detailed amenities and immersive 360-degree interactive views** via **RESTful APIs**, **increasing user engagement by 20%** and **system responsiveness by 15%**.
- Actively participated in **code reviews** and managed project codebase using **Git version control**, contributing to **improved code quality by 15%** and streamlined workflows.

EDUCATION

Vivekanand Education Society's Institute of Technology

Master of Computer Applications | 9.71 CGPA

2020-2022

City Premier College

Bachelors of Computer Applications | 64.51 %

2017-2020

PROJECTS

Smart Industrial Dashboard

2022 - 2024

- Developed an **Industry compliant dashboard** for factory automation using **JavaScript** and **Bootstrap**, enabling real-time device control, scheduling, and management.
- Implemented **WebSockets** and **MQTT** for real-time data streaming, driving **Chart.js graphs** for energy consumption/runtime visualization, and integrating automated alerts (email notifications, temperature thresholds) to **optimize operations by 40%**.
- Designed and built **responsive web applications** from **Figma** prototypes, integrating **lazy loading** concepts and **Bootstrap** to **improve initial load times by 15%**.

Smart Station & City Guide

2024 - 2025

- Developed a comprehensive **information portal** for a railway station, meticulously detailing **amenities** plotted as **interactive pin points** across all platforms, along with accessibility features and essential station services.
- Implemented advanced mapping and navigation features utilizing **Google Maps**, **Geolocation API**, and **Direction API** for precise "how-to-reach" guidance, **distance calculation** for points of interest, and immersive **360-degree views** of key locations.
- Designed a responsive and intuitive user interface using **Bootstrap** and **JavaScript**, providing seamless access to nearby tourist places and transportation options from the station, enhancing overall traveler experience.

Hidden Trails

2025

- Designed and developed a responsive web application, "Hidden Trails," using **React.js** to deliver an intuitive platform for discovering unique homestays, local culinary experiences, and integrated **Direction APIs**.
- Engineered the **full-stack RESTful API** using **Node.js** and **Express.js**, managing **JWT-based authentication**, data persistence in **MongoDB (Mongoose ODM)**, **[Payment Gateway, e.g., Stripe/Razorpay]** integrations, and automated email services; successfully deployed the application on **[Hosting Platform, e.g., Vercel/Netlify for frontend and Heroku/AWS EC2 for backend]** for live access.

SKILLS

LANGUAGES : HTML5, CSS3, JavaScript (ES6+), TypeScript

FRAMEWORK : React.js, Bootstrap, Tailwind CSS, jQuery

TOOLS & TECHNOLOGIES : Node.js, Git & GitHub, VS Code, Figma (for UI), Chart.js, REST APIs, Postman, Vercel

DATABASES : MongoDB, SQL

CERTIFICATIONS & BADGES

- Hubspot SEO Certification (Hubspot) | 2024
- Prompt Design in Vertex AI (Google Cloud Skill Boost) | 2025
