Aim

Software Developer with 3.5 years of experience in building dynamic web applications using JavaScript, TypeScript, and React. Developed robust REST APIs and customer-facing components while optimizing CICD pipelines and service reliability. Proven ability to collaborate with cross-functional teams to deliver seamless integrations and high-quality software solutions.

Skills

- **Programming Languages:** JavaScript, TypeScript, C#, C++, Java, Dotnet
- **Frontend Technologies:** HTML5, CSS, Tailwind, Bootstrap, React.js, Angular, Next.js
- **Backend Technologies:** Nodejs, Express.js, ASP.Net Core, Web API
- **Databases:** MySQL, SQL, MongoDB, Postgres
- **Tools And Platforms:** Git, AWS, Jenkins, CI/CD, Docker, Kafka, Kubernetes, Linux, Windows, JIRA, Jest, Unit Testing, Testing and Postman, Rest Assured
- **Concepts And Others:** Data Structures, Algorithms, OOPs, Microservices, RESTful APIs, useQuery, MVC, AJAX

Work Experience

Uber **Aug 2024 - Present**
Hyderabad, IN
Frontend Developer

Utilized HTML5, Tailwind CSS, JavaScript, TypeScript, React.js, Next.js, and .NET Core to build and maintain high-quality user interfaces with a focus on responsive design.

- Developed and maintained the Driver Test Intake App to onboard and assess new drivers, ensuring a seamless and intuitive user experience while integrating REST APIs for dynamic data exchange.
- Collaborated with cross-functional teams including backend, design, and product to implement new features and work-flows using React.js, TypeScript, and Redux, ensuring alignment with service reliability targets.
- Built dynamic and reusable customer-facing components for test modules, driver data forms, and assessment interfaces, emphasizing accessibility and performance.
- Implemented real-time form validation, state management, and REST API integrations to maintain smooth data flow and improve system robustness.
- Optimized application performance and accessibility, reducing load times and enhancing Lighthouse scores.
- Participated in regular code reviews and agile ceremonies, contributing to continuous improvements in code quality and team velocity.

Nagarro **Feb 2023 - Aug 2024**
Gurugram, IN
Engineer

Leveraged HTML5, Tailwind CSS, JavaScript, TypeScript, React.js, Next.js, and .NET Core to construct dynamic, interactive web applications that enhance user experiences.

- Constructed dynamic and interactive web applications with React, Angular, TypeScript, HTML5, and CSS3, boosting user satisfaction scores by 30% and decreasing bounce rates by 20% through improved UX/UI design.
- Managed weekly production releases and monitored production environments while addressing infrastructure-related issues in collaboration with the DevOps team, maintaining a 99.9% uptime.
- Designed responsive dashboards with real-time data updates using the Next.js framework, featuring interactive filters and Google Maps integration to increase user engagement by 60%.
- Utilized a tech stack including React.js, Redux, Next.js, TypeScript, and Postman to develop robust web applications supporting over 10,000 daily active users with integrated RESTful API functionalities.
- Engineered and deployed dynamic user interface components using core React concepts, increasing application performance by 40% and reducing load times by 25%, which led to a 20% boost in user retention.

Nagarro Software Pvt Ltd **Mar 2022 - Dec 2022**
Gurugram, IN
Associate Software Engineer

Applied .NET, MVC, Web API, React.js, and C# to engineer RESTful API endpoints within a .NET MVC architecture, enhancing reimbursement processes and ensuring data integrity.

- Leveraged Spring Boot's auto-configuration and dependency injection to develop microservices that integrated seamlessly with React.js frontend components, reducing integration time by 40%.
- Optimized Spring Boot applications to achieve a 50% increase in performance and scalability for large-scale operations.
- Revamped reimbursement processes to improve efficiency by 60%, enhance transparency by 50%, and ensure compliance, resulting in a 35% reduction in processing time and a 25% boost in user satisfaction.
- Enhanced testing methodologies and debugging practices, increasing defect detection rates by 20% through the implementation of improved test plans and cases.

Education

Dr APJ Abdul Kalam Technical University

2018 - 2022

Bachelor of Technology, Computer Science

- **GPA:** 8.4/10.0
- **Coursework:** Data Structures, Algorithms, DBMS, Operating Systems

Projects

Blog application

Feb 2022

Nagarro Software Pvt Ltd

Gurugram, IN

- Collaborated with a team of developers to create an automated link tester, reducing testing costs by 50% and improving testing efficiency by 40%.
- Developed backend components for web applications and services, enhancing functionality and performance, resulting in a 35% improvement in response times.
- Implemented user authentication and authorization using JWT, increasing security and reducing unauthorized access incidents by 60%.
- Developed RESTful APIs with Express.js for CRUD operations on blog posts, comments, and user profiles, reducing API response time by 25%.
- Designed a responsive and intuitive user interface with React.js, improving cross-device usability and user engagement by 30%.

Achievements and Strengths

- Solved over 500+ problems on LeetCode and achieved 1400 rank in coding contests.
- Completed the PepCoding Data Structures and Algorithms course.
- Rated 6 Star on HackerRank and 3 Star on LeetCode.
- Unique approach to debugging, identified and resolved a memory leak improving performance by 30%.
- Deep expertise in frontend technologies.
- Developed a real-time payment gateway application using Erlang.
