PROFILE SUMMARY

Software Engineer with 3.5+ years of experience in React.js, Next.js, and TypeScript. Built high-performance web applications prioritizing UX, accessibility, and responsiveness. Led a cross-functional team, delivering complex projects on time. Continuously learn and adapt, implementing cutting-edge technologies to achieve impactful results in agile environments.

EXPERIENCE

MITR Learning and Media

Mumbai, India

Software Engineer Band 1

June 2021 – Present

- Constructed a reusable component library (20+ UI elements), boosting development velocity by 25% and enhancing code maintainability.
- Optimized website performance by implementing code splitting, lazy loading, and image optimization, reducing page load times by 25% and improving user engagement.
- Streamlined component rendering and leveraged memoization techniques, enhancing website performance by 30% and creating a more responsive user experience.
- Implemented a comprehensive testing suite using Jest, React Testing Library, and Vitest, achieving 95% test coverage and significantly reducing the risk of regressions.
- Enhanced website accessibility by implementing ARIA attributes and keyboard navigation for all interactive elements, increasing accessibility scores to 95% and ensuring inclusivity for all users.
- Developed and executed a robust end-to-end testing strategy using Playwright, identifying and resolving over 10 critical bugs before release.
- Improved application build efficiency through effective code splitting and lazy loading, reducing bundle size by 15% and enhancing overall loading performance.

EDUCATION

M.H. Saboo Siddik College of Engineering

Mumbai, India

B.E in Information Technology **CGPI: 9.10**

Sept 2018 – Jun 2021

Government Polytechnic Mumbai

Mumbai, India

Diploma in Information Technology **Percentage: 86.87%**

Sept 2015 – Jun 2018

AWARDS & ACHIEVEMENTS

ACM Hackathon Winner: First Prize and Mindscrip Projects Internship for exceptional performance in inter-college ACM Hackathon.

Hackerrank: Achieved 5 ★ badges in Python and Java, completing the "30 Days of Code" challenge.

PROJECTS

Next Food App 🍴

- Developed a full-stack web application, "Next Food App," using Next.js, TypeScript, Server Components, and App Router. This platform allows users to share, explore, and discover delicious recipes.
- Leveraged Next.js Server Components to enhance application performance and improve data fetching efficiency, resulting in a faster and more responsive user experience.

Portfolio Builder 📁

- Created a portfolio generator that allows users to create unique, customized portfolios using their own data, resulting in a 20% increase in user engagement as measured by average time spent on the platform.
- Leveraged React and Redux Toolkit for efficient state management, reducing development time by 15% while maintaining a clean and maintainable codebase.

SKILLS

Programming Languages: JavaScript, TypeScript, Python, Java, PHP, C++

Frameworks: React.js, Next.js, CodeIgniter, PyQt5

Design Tools: Figma, Adobe XD, Photoshop

CI/CD: Jenkins, GitHub Actions

Database: MySQL, Oracle, SQL

Cloud: AWS, Google Cloud

Version Control: Git, GitHub, SVN
