## EXPERIENCE

### Software Developer

Bombay Softwares

Oct 2023 - Present

Ahmedabad, IN

- Developed a user interface for a PMO tool to streamline the management of project sprints, phases, and resources using **React.js** and **JavaScript**.
- Developed a feature to manage multiple projects in a **single tool**, significantly enhancing the project manager's efficiency in overseeing projects.
- Built a dynamic **Data Table** component with customizable columns for efficiently displaying data on the UI.
- Working in an **Agile** programming environment involves defining stories, estimating tasks, and planning sprints.
- Successfully implemented secure user authentication and authorization mechanisms in the **PMO tool**.
- Implemented error handling and validation mechanisms using **Formik** and **Yup**, increasing data reliability.
- Collaborated with backend developers to **integrate REST APIs**, improving operations and functionality.

### Data Analyst

Bombay Softwares

Aug 2022 - Sep 2023

Ahmedabad, IN

- Developed metadata using **Python** and an **in-house** scripting language to optimize data processing workflows and improve system integration.
- Processed **BlazePose** data for accurate feature extraction and analysis.
- Performed data cleaning and **integrity** maintenance, identifying inconsistencies and ensuring reliability.
- Calculated and implemented **exercise tolerances** to optimize performance metrics and enhance system accuracy in monitoring and evaluating **user exercises**.

## EDUCATION

### Bachelor of Technology in Computer Science Engineering,

Netaji Subash Institute Of Technology

CGPA: 8.1/10

2018-2022

Patna, Bihar

## TECHNICAL SKILLS

### Programming Languages

HTML, CSS, JavaScript, TypeScript

### Proficient

ReactJs, Bootstrap

### Exposure

Blockchain, Machine Learning

### Miscellaneous

Agile, GIT, Github, Visual Studio Code

## PROJECTS

### Job Portal

- Developed a job portal enabling recruiters to post job openings and candidates to apply for available positions.
- Integrated Supabase and Clerk for real-time data and passwordless authentication.
- Efficiently managed state and API interactions using React hooks, Context API, and RESTful API integration.
- Implemented features for posting and applying to job listings with a seamless user experience.

## AWARDS & HONORS

- Won 1st Prize in National Seminar on Advancement in **Wireless Communication** for Presentation.
- Won 2nd Prize in CSI Convention on **Blockchain Technology** for Presentation.
