Experience Summary

Detail-oriented Front-End Developer with 2 years of experience working with HTML, CSS, JavaScript, and React.js. Highly adept at both independent and collaborative projects with an emphasis on landing page and website development.

Technical Skills

- JavaScript
- Java
- React.js, Angular
- Git and GitHub
- HTML, CSS and MY SQL, PHP

EXPERIENCE

Front-End Developer

10/22– 07/24

Sopra Steria, Noida

- Developed a secure, interactive web application with a modern front end-framework and intuitive user interface.
- Developed web pages enabling clients to send large files of PDF text and Excel in gigabytes using HTML, CSS, and JavaScript.
- Collaborated with design and product teams to optimize user experience and enhance the visual appeal of web applications.
- Utilized version control systems such as Git to manage and track changes in the codebase.
- Employed asynchronous JavaScript techniques such as promises or async/await to handle database operations asynchronously, preventing blocking and improving responsiveness.

Engineer- Trainee

08/22 – 09/22

Sopra Steria, Noida

- Collaborated with senior engineers to develop and implement user-friendly interfaces for web applications, utilizing HTML5, CSS3, and JavaScript.
- Participated in code reviews, providing constructive feedback and incorporating best practices to enhance code quality and maintainability.
- Actively engaged in learning new front-end technologies and frameworks, such as React.js, through online courses and self-study.
- Actively participated in Agile development processes, including sprint planning, stand-up meetings, and retrospective sessions, to ensure the timely delivery of front-end tasks.

PROJECTS

Project Name: Telefonica.

Technology: React.js, Redux, Axios, Tailwind CSS, Material Icons.

Brief:

- The website's task is to manage user data using telecommunication technology.
- The website is built using React, JavaScript, HTML, and CSS.
- While working, I gained knowledge of Nutcracker Technology.
- I generally manage the front-end part but also work on the backend to push data for the UI.

Team Size: 6 Member.

Project Name: Speos.

Technology: React.js, HTML5, CSS3, Tailwind CSS.

Brief:

- The main task of the website is to 'share large files of any format from one server to another.
- The website is built using React, JavaScript, HTML, CSS, and SQL.
- My role is to manage the UI of the website and make it user-friendly.
- I developed the code for the front-end part so that the functionality works easily for users.

Team Size: 2 Member.
