

NIKHIL THORAT

Angular Developer

+91 8237719148 • nikthorat4@gmail.com • <https://www.linkedin.com/in/nikhilthorath/> • Hyderabad, Telengana, India

Summary

Experienced Angular developer with two years of expertise in utilizing Angular technology to create innovative, scalable, and high-performance applications. Throughout my career, I have consistently demonstrated the ability to design and implement robust solutions, surpassing project objectives while maintaining a focus on performance, scalability, and long-term maintainability.

Skills

Angular Framework • JavaScript • TypeScript • HTML • CSS • SCSS • Bootstrap • Rxjs • Oracle • MySQL • Java • GIT • SVN

Experience

Intellect Design Arena Ltd

Hyderabad, Telengana, India

Product Engineer

09/2022 - Present

- **Role Overview:** As part of the web development team, my primary focus is on creating front-end features for Treasury Risk Management Finance Platform for Banks. Using Angular 16, I specialize in developing and maintaining the trades/deals module, covering various financial modules like fixed income, money market, and foreign exchange.
- Angular for dynamic UI development, integrated with RESTful APIs to process and display trade data efficiently.
- Signals and resolvers to ensure smooth data flow and state management. SCSS for creating consistent, scalable, and visually appealing styles.
- Enhanced trading efficiency by developing dynamic front-end interfaces using Angular, improving user interaction time by 30%.
- Reduced styling inconsistencies by 20% through the implementation of SCSS for responsive designs.
- Proficient in Reactive Forms for creating reusable, dynamic data fields.
- Skilled in integrating and manipulating data from RESTful APIs within Angular applications.
- Experienced in version control using GIT to manage and collaborate on projects effectively.
- Successfully deployed projects on WebLogic, ensuring stable application performance.

Revature

Pune, Maharashtra, India

Software Engineer Trainee

04/2022 - 08/2022

- Acquired comprehensive hands-on experience as a Trainee Full Stack Developer, building a robust understanding of software development practices.
- Demonstrated expertise in leveraging frameworks like Angular and Spring Boot, and tools such as Postman for testing and debugging APIs.

Projects

Treasury (Capital-Cube)

- In the Treasury project, I initially worked on an Angular 4 application and later led its migration to Angular 16. To managing the entire trade lifecycle from initiation to settlements and maturity, featuring configurable STP for seamless operations across front, middle, and back offices.
- Developed the Static Data Maintenance module within the Treasury application to centralize data entry for trades and deals across modules like Fixed Income and Money Market, while designing dedicated blotters for summarizing records by module and entity, improving visibility and operational efficiency.
- Leveraged Reactive Forms with PrimeNG components for dynamic, reusable fields, and used resolvers for pre-fetching data to enhance user experience. Additionally, utilized Angular signals for efficient data manipulation and smooth state management.

CBX-FX

- In the CBX-FX project, I developed a unified trading platform that meets the comprehensive needs of the bank's customers, allowing them to view, transact, and organize their workspace with a single click. I integrated real-time exchange rate data across currencies and implemented features for trade tracking and deal booking, enhancing the user experience with dynamic blotters, graphs, and charts.
- Leveraged Angular 16, Bootstrap, PrimeNG, SCSS, and ECharts for dynamic visualizations, signals to optimize data flow and performance.

Education

P.E.S. College of Engineering (DBATU)

Aurangabad, Maharashtra, India

B.Tech in Computer Science And Engineering

2019 - 2022

Government Polytechnic (Autonomous)

Aurangabad, Maharashtra, India

Diploma in Information Technology

2016 - 2019
