SUMMARY

A dynamic Software Developer with 3.3 years of experience in building, optimizing, and modernizing web applications. I enhanced development speed and code quality by creating reusable components and modernizing old code Bases. Professional Frontend Developer with robust background in building and optimizing web applications. Proficient in JavaScript, ReactJS, Redux, Angular, HTML, Tailwind CSS, Bootstrap and modern front-end development practices. Adept at collaborating in cross-functional teams to deliver high-quality solutions. Experienced in cloud hosting and deployment using AWS.

SKILLS

- Programming Languages: Javascript, TypeScript
- Web Technologies : Angular, ReactJs, Redux
- Styling : HTML/CSS, Material UI, Bootstrap, Tailwind CSS
- AWS Services : S3, Cloudfront
- Testing : Manual, Functional, Unit Testing
- API Integration, Responsive Web Design

EDUCATION

Bachelor Of Engineering in Computer Science

University Of Mumbai

PROFESSIONAL EXPERIENCE

Software Developer (3.3 Years)

2021 – present
Thane

Applied Cloud Computing

- Developed reusable components, improving development speed and code quality.
- Designed and implemented user interfaces for AWS-based deployments.
- Ensured cross-browser compatibility for all web applications.
- Updated old code bases to modern development standards, improving functionality.
- Contributed to a positive team environment through effective communication, problem solving, and collaboration skills.

PROJECTS

Bandhan Mutual Funds - Distributor Portal

- Developed modules for login, registration, empanelment, and financial transactions (SWITCH, STP) using ReactJS and Redux for state management.
- Integrated APIs for seamless data exchange between frontend and backend systems.
- Optimized page speed and enhanced code quality, improving overall user experience.
- Collaborated with Business Analysts (BAs) and cross-functional teams to track task progress and ensure timely project delivery.
- Mentored team members, providing guidance on best practices for coding and troubleshooting.

HDFC-Call Vault

- Revamped UI/UX for a banking application, enhancing user interactions
- Integrated APIs for all application modules, ensuring smooth data transactions and real time updates.
- Deployed the application on the client's server, ensuring proper configurations for stability and performance.
- Worked closely with the backend team for seamless API integration and timely deployments.

Health App for ITECHO

- Developed responsive UIs for two separate applications for patients and clinicians using ReactJS, Material UI, and Redux for state management.

- Deployed the applications in different environments (UAT, Production) using AWS S3 and CloudFront for cloud hosting and content delivery.

National Pension Sewa

- Developed the Withdrawal functionality for the National Pension Sewa application, optimizing the flow for end-users.
- Integrated APIs for all major functionalities to ensure smooth data transactions.
- Ensured responsiveness across all screens using SCSS and CSS, providing a seamless experience for users.
- Collaborated with backend developers to ensure successful API integration and application performance.
