TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Core Java, PHP
- **Markup/Style:** HTML, HTML5, XML, CSS3, SASS, SCSS.
- **Concepts:** Data Structures and Algorithms, Problem-Solving, Object-Oriented Programming, MVC, API, Rest API.
- **Libraries/Frameworks:** ReactJS, Angular, NGRX, RxJS, NodeJS, ExpressJS, JQuery, Bootstrap, MUI, Angular Material UI
- **Databases:** SQL, MySQL, MongoDB, Firebase.
- **Tools & OS:** Git, Github, Linux, Windows, VS Code, Git Lab, Jira.

PROFESSIONAL EXPERIENCE

ATAI Labs Pvt Ltd., Frontend Engineer - II

Apr 2024 – present

- Independently Developed BMCT app from scratch using **Angular 18** leveraging **Standalone Components** for enhanced **maintainability and scalability**.
- The responsive app includes feature login, used **JWT Authentication**, **Protected Routes** with **AuthGuard** Reset password using **SMTP**, live inference data capture using **Socket.IO**, history dashboard, multiple Search Filters, Sorting, and Pagination for tables.
- Developed a feature that communicates between the WebApp and Android through **WebView** integration.
- Implemented functionality utilizing the **Google OCR API** to extract container numbers from images, Automating form filling for a Container Survey process.

ATAI Labs Pvt Ltd., Frontend Engineer - I

Nov 2022 – Apr 2024

- Utilized **REST APIs** to load and dynamically render data served by the backend server.
- Analyzing **Front-end site performance** and improving it to render fast via applying **Lazy Loading**.
- Implemented **Stateful Dynamic UI Components** Alert Popup, Toasts, Filter Popup, and Buttons, using **Material UI** and **SCSS**.
- Innovatively designed a feature enabling users to navigate seamlessly within the application while **Asynchronous** reports downloading.
- Engineered data presentation with a **high-performance Virtual Scroll** Table capable of effortlessly managing **10K+ entries**, ensuring a smooth and **Responsive** user experience.
- Implemented real-time data visualization table using **Web Socket** and **chartJS**.
- Created Test Cases for Each Component using **Jasmin Karma** with more than **90% Code coverage**.

Invennico TechnoLab, Jr. Software Engineer

Dec 2021 – May 2022

- Enhanced user experience by integrating **Drag and Drop API** functionalities for file movement, optimizing file management for increased productivity and user satisfaction.
- Elevated user experience by implementing **File Uploading Validation**, **Dynamic Progress Bar** updates, and **PDF generation** features **FPDF**.

PROJECTS

Phone Directory

- Produced a responsive Phone Directory App with Add, Edit, Delete, View features.
- Implemented router for seamless navigation. Integrated a user-friendly filter search, enabling contact retrieval by Name.
- Used Tech Stack : ReactJS, NodeJS, ExpressJS, Firebase, Fontawesom, CSS, Bootstrap, React Router DOM.

Jarvis Web AI

- Jarvis App inspired by Iron Man's AI, allowing users to command through voice inputs.
- Developed functionality to execute tasks based on user commands fed into the Jarvis System.
- Used Tech Stacks : **SpeechRecognition API**, **SpeechSynthesisUtterance API**, JavaScript, HTML, CSS, SVG.

Dynamic Calendar

- Dynamic Calendar App and added functionalities dynamic user's location, Temperature, Filter calendar by year, month, and current date. You can add event to this calendar and delete functionality.
- Used Tech Stack : HTML, CSS, JavaScript, Local Storage, Geolocation API, and Open weather API.

EDUCATION

Chhattisgarh Swami Vivekanand Technical University (CSVTU),
CGPA - 7.80, B.Tech. (CSE)

2015 – 2020

ACHIEVEMENTS

- Solved 280+ problems on Leetcode 
- Achieved 428 Rank out of 16500+ Coders in the Newton School Coding Contest 
- Successfully completed the Full Stack Web Development certification course with distinction from Newton School. 
- Earned the LinkedIn Skill Badge for PHP
