OBJECTIVE

Frontend Developer with 1.5 years of experience specializing in React.js. Proven expertise in developing scalable and high-performance web applications, delivering effective and efficient solutions. Skilled in API integration, unit testing (Jest), Webpack, Babel, and performance optimization. Strong background in Agile Scrum environments, ensuring multi-browser compatibility and cross-device responsiveness. Committed to building reusable components, following industry best practices, and continuously enhancing user experience.

EDUCATION

Bachelor of Engineering: Electronics and Communication Engineering

Sri Sai Ram Institute of Technology

August 2019 - April 2023

CGPA: 8.97

SKILLS

Programming Languages:	Python, JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL
Frontend Technologies:	React.js, Node.js, Bootstrap, SASS, LESS
Frameworks and Libraries:	Workflows (Redux), Material UI, Tailwind CSS, Webpack, Babel, Jest, Django
Database:	MySQL, SQLite, MariaDB
API:	RESTful API Design, Development, Integration and Testing
Version Control:	Git, GitHub
Testing:	Unit Testing (Jest)
Development Tools:	VS Code, Webpack, Babel, NPM
Agile and Methodologies:	Agile Scrum, Sprint Planning
Development Tools:	VS Code, Webpack, Babel, NPM

EXPERIENCE

Frontend Developer

July 2023 - November 2024

Stitch Financial Technologies

Chennai, India

Project: *Stitch platform UI - React.js*

- Optimized the Stitch platform's UI, increasing customer onboarding efficiency by 30% and reducing transaction processing time by 25%, with a focus on usability, responsive design, and user-centered principles.
- Led the design and implementation of a seamless user experience on the platform, resulting in a 30% improvement in operational efficiency, customer satisfaction, and task automation through usability investigation, accessibility, and mobile-first design.
- Developed and deployed a responsive and interactive UI for transaction tracking, payment management, and account setup, collaborating closely with product teams and iterating based on user feedback.
- Increased user engagement by 20%, boosted conversions by 15%, and improved user retention by 18% through cross-functional teamwork and regular collaboration with stakeholders to improve the design and usability of the platform.
- Optimized front-end performance through code splitting, lazy loading, and image optimization, improving both user experience and platform speed.
- Implemented unit testing strategies with Jest, improving code coverage and application stability.
- Reusable components delivered using React.js and Redux, ensuring scalability and reducing technical debt.

Project: *Stitch Website* <https://www.stitch.sa/>

- Achieved a 20% growth in mobile traffic by leveraging the Hugo Framework, responsive design techniques, and cross-device optimization skills.
- Led the translation of Figma designs into high-quality code, collaborating with UX/UI designers to ensure a seamless user experience.
- Improved bounce rate by 15% through the implementation of user-centric design and performance optimization strategies.
- Modernized performance optimization strategy by refactoring code, implementing best practices, and improving page load times by 35%, resulting in a 25% boost in SEO rankings
- Coordinated code release processes, bundling, and packaging applications for production environments, ensuring smooth and timely deployments.
- Actively participated in Agile Scrum ceremonies, contributing to daily stand-ups, sprint planning, and code reviews, ensuring the timely and efficient delivery of projects.

Frontend Developer Intern

January 2022- February 2022

The Sparks Foundation

- Introduced a modern, user-friendly frontend interface for a banking system management project, applying UX/UI design principles and user-centric design, resulting in a 30% increase in user satisfaction and engagement.
- Applied responsive design principles using HTML5, CSS3, and JavaScript to ensure cross-device compatibility and mobile optimization, leading to a 25% reduction in mobile user complaints.
- Enhanced the mobile user experience by prioritizing mobile-first design and optimizing page load times, significantly improving mobile interactions and user retention.
- Employed best practices in web development, such as modular code structure, clean code principles, and version control, boosting project efficiency, code maintainability, and scalability by 20

CERTIFICATES

SQL Certification Course

August 2022

Completed training in Databases and SQL through the Great Learning platform.

Web Development Fundamentals

November 2020

Earned certification in Frontend Web Development via the Udemy platform.

Crash Course on Python

July 2020

Acquired proficiency in Python through a crash course offered by Google.

ADDITIONAL SKILLS AND ATTRIBUTES

- Deep understanding of RESTful API integration and building responsive web applications with cross-browser compatibility.
- Passion for staying up-to-date with the latest frontend development trends, including component-driven architecture, server-side rendering (SSR).
- Excellent problem-solving abilities and analytical skills, with a talent for diagnosing complex issues and delivering optimized, high-performance solutions.
- Excellent communication and collaboration skills, working effectively with both technical and non-technical stakeholders to ensure successful project delivery..
- Proficient in JSON for data interchange and API integration, ensuring efficient communication between frontend and backend systems.
- In-depth understanding of the Software Development Life Cycle (SDLC), with experience in each phase from planning and design to testing and deployment.
- Experienced in developing Single Page Applications (SPA) using React.js, ensuring smooth user experiences and faster load times with dynamic content rendering.
