Summary

I'm a software developer with over 2.5 years of experience, who's all about balancing perfectionism and practicality. I have a passion for simplifying complexities and making things as easy as possible. Looking forward to collaborate on crafting user-friendly, efficient, and impactful software solutions.

Skills

- **Languages:** C, C++, Python, JavaScript, TypeScript
- **Frontend:** TailwindCSS, React.js, Redux, Next.js, Electron.js
- **Backend:** Nest.js, Django, Flask, FastAPI, Node.js, Express.js,
- **Database:** MongoDB, PostgreSQL
- **Others:** Docker, Celery, Selenium, Git

Work Experience

1. **SDE1: Backend Developer at Kredily 04/2024 - Present** As a Backend Developer at Kredily, I have worked across all modules of its HR and payroll platform, including employee management, attendance, payroll, and compliance. I have developed scalable backend systems to automate processes, ensure data accuracy, and enhance system efficiency, helping businesses streamline operations and unlock their potential. I designed and built the complete backend for the Timesheet project from start to finish. This standalone system, developed using FastAPI and PostgreSQL, enables efficient time tracking, reporting, and workforce management. I implemented robust APIs, optimized database performance, and ensured seamless integration with existing HR modules, enhancing productivity and operational transparency.
2. **Associate Software Developer at Texau 05/2023 - 02/2024** Built and managed the Visalaw website, incorporating features such as document uploads in the library. Implemented summarization functionality for pages individually, in groups, or as a whole. Facilitated communication via chat for legal and personal document discussions. Integrated telecom functionalities and various settings for legal verifications.
3. **AI Automation Intern at NimbleWork 11/2022 - 04/2023** Proficiently developed automation scripts utilizing Python, Selenium, and Java, contributing to enhanced efficiency across projects. Successfully automated tasks for the Kairon Product bot and optimized workflows on the NimbleWork website. Additionally, conducted precise web scraping operations to gather essential data for further analysis and improvement.

4. **SDE Intern at Bobble.ai 03/2022 - 09/2022** Created a web app for internal testing of Bobble keyboards using JavaScript, React, Electron.js, and Redux Toolkit. Authored automation scripts for keyboard automations in different languages.
5. **Frontend Developer Intern at Heart it Out 08/2021 - 09/2021** Designed frontend pages for the Heart it Out website using Bootstrap, React and JavaScript. Played a major role in enhancing the user interface of the Heartitout website.

Project

- **Authentication System:** Developed a secure authentication system using React.js, Electron.js, and Firebase.
- **Docker Project for Joomla WebApp:** Set up a Docker-based infrastructure for a Joomla WebApp, ensuring scalable deployment.
- **Automation Projects:** Instagram, Bobble Keyboard App, NimbleWork website, and Kairon Bot using Selenium, Appium, and BDD framework.
- **URL Shortener Project:** Created a URL shortener using React.js for the frontend and Node.js with Express and Mongoose for the backend.
- **Map Explorer:** Built a mapping application with React and Redux, allowing users to explore maps of different regions. Utilized OpenStreetMap (OSM) for maps and Turf.js for geographical calculations.

Work Education

B.tech: Computer Science Engineering: 2019-2023

Rajasthan Institute of Engineering and Technology
Jaipur, Rajasthan

Certifications

- Introduction to Google Cloud Identity: Google
- Web Developer Bootcamp: Udemy
- The Complete Python Course: Udemy
- Expertise in Docker: LinuxWorld: IIEC Rise
- Problem Solving through Programming: NPTEL
- Cloud computing: NPTEL
- Computer Graphics: NPTEL
