

MANIKNAT A

FULL STACK DEVELOPER - 2Y

+91 7022647554
mania2621@gmail.com
Bangalore, Karnataka 560102

PROFESSIONAL SUMMARY

Experienced Full-Stack Developer with a proven track record of **designing** and **deploying** scalable, **high-performing web applications** using the **MERN** stack (MongoDB, Express.js, React.js, Node.js). Over the past **2 years**, I have honed my expertise in state management, **RESTful API integration**, and database optimization, consistently delivering end-to-end solutions that align with business goals and enhance user experiences. I thrive in fast-paced, dynamic environments, seamlessly adapting to emerging technologies and integrating them into existing tech stacks. My ability to quickly master new tools and frameworks makes me a highly flexible and versatile contributor to any team. A passionate and detail-oriented professional, I am deeply committed to continuous **learning, collaboration**, and **developing innovative solutions** that drive business success.

WORK EXPERIENCE

Fullstack Developer | July 2023 - March 2025

Eywatree Technologies PVT Ltd - Bengaluru, Karnataka

Eywatree Technologies is a product-based company. I work as a Frontend Developer on Naadi™, a platform that empowers manufacturers to transition from paper-based traceability to a unified digital solution.

- Developed and maintained dynamic, user-friendly web interfaces using React.js and React Native for scalable web and mobile applications.
- Built robust back-end services and RESTful APIs with Node.js and Express, ensuring seamless integration between the client and server.
- Managed database architecture using MongoDB, optimizing queries and indexing to handle large-scale data operations.
- Collaborated with UI/UX designers to translate wireframes into responsive, interactive, and accessible interfaces.
- Implemented secure authentication and authorization mechanisms with JWT and middleware.
- Optimized API response times and improved system performance to meet increasing user demands.
- Built and maintained state management systems using Redux to facilitate efficient data handling.
- Resolved critical performance bottlenecks to enhance user experience and operational efficiency.
- Participated in Agile sprints with cross-functional teams to deliver timely updates and new features aligned with business goals.

Technologies:

- Frontend: React.js, React Native, Redux, Bootstrap, Sass, CSS, HTML
- Backend: Node.js, Express.js
- Database: MongoDB
- Tools: Git, Postman, Jira, VSCode

Fullstack Developer (MERN) | Feb 2023 - May 2023

Zcienta Lab PVT Ltd - Bengaluru, Karnataka

During my internship at Zcienta Lab Pvt. Ltd., I contributed to the development of an Applicant Tracking System (ATS), aimed at streamlining the recruitment and hiring process. The system was designed to help employers efficiently manage postings, track candidate applications, and evaluate candidates, ensuring a smooth and organized workflow throughout the hiring lifecycle.

- Key Responsibilities :
- Full-Stack Development:
- Used React.js to build a dynamic and interactive front-end, ensuring smooth user experience across devices. On the back end, I worked with Node.js and Express.js to handle server-side logic, API integrations, and database management with MongoDB.
- Designed and optimized MongoDB schemas to efficiently handle job postings, candidate data, and application status.
- Ensuring quick retrieval of data across various stages of the hiring process.
- User Interface Design:
- Developed a responsive and intuitive user interface using Bootstrap, CSS, and HTML, ensuring the application was mobile friendly and easy to navigate for both employers and candidates.

Technologies :

- MongoDB, Express.js, React.js, Node.js, Bootstrap, CSS, HTML, Redux
- Frontend: React.js, Redux, Bootstrap, CSS, HTML
- Backend: Node.js, Express.js
- Database: MongoDB
- Tools: Git, Postman, Teams, VSCode

PROJECTS

OTT Movie Platform

- Live Links: [MK OTT Movie Platform](#)
- Skills Used: Next.js, Bootstrap, CSS, HTML

Description: This application is designed as an OTT (Over-The-Top) movie platform, providing users with a seamless way to explore movies, rate them, and share their opinions.

Key Features:

- 1.Movie Browsing: Users can browse a catalog of movies and view details such as synopsis, genre, cast, and ratings.
- 2.Rating System: Allows users to rate movies, contributing to the platform's dynamic review database.
- 3.User Reviews: Enables users to leave and view reviews, fostering engagement and interaction among movie enthusiasts.

Google Login Integration

- Technology Used: Node.js
- Backend: [GitHub Repository](#)

Description: This project implements a secure and efficient Google login feature, allowing users to authenticate using their Google accounts.

Key Features:

- 1.OAuth 2.0 Integration: Utilized Google's OAuth 2.0 API for secure and seamless user authentication.
- 2.User Session Management: Managed user sessions efficiently to ensure a smooth login experience.
- 3.Data Security: Ensured the protection of user credentials and sensitive information during the login process.

E-Shop

- Technology Used: MERN (MongoDB, Express.js, React.js, Node.js)
- Live Demo: [E-Shop Platform](#)

Description: This project involves developing and implementing an online platform for buying and selling products or services, offering users a seamless e-commerce experience.

Key Features:

- 1.Product Catalog: Displays a wide range of products with detailed descriptions, images, and prices.
- 2.User Accounts: Users can create accounts, manage profiles, and track orders.
- 3.Shopping Cart and Checkout: Implements a cart system and secure payment gateway for a smooth purchasing process.

Naadi App (Android)

- Technology Used: React Native

Description: Naadi App allows users to create orders, scan items or box barcodes, and manage deliveries or rejections. It works seamlessly in both offline and online modes, syncing data automatically once connected to the internet.

Key Features:

- 1.Barcode Scanning: Scan item or box barcodes to fetch data for deliveries and rejections.
- 2.Offline & Online Modes: Operates offline and syncs automatically once the internet is available.
- 3.Real-Time Tracking: Track the status of items—sent, pending, rejected, or synced.

Note : More (+2)

TECH STACK

- React js
 - Node js
 - Java Script
- Mongo db
 - React Native
 - Html
- Next js
 - Redux
 - Bootstrap
- Sass
 - css
 - Express js

EDUCATION

Visvesvaraya Technological University (VTU)

- Bachelor of Engineering 2019 - 2022

CERTIFICATES

Internship Completion Certification | Feb 2023 - May 2023

Zcienta Lab PVT Ltd - Bengaluru.

Successfully completed a 3-month internship as a Fullstack Developer, contributing to the development of an Applicant Tracking System (ATS). Gained proficiency in MongoDB, Express.js, React.js, Node.js, Redux, and Bootstra

Fullstack Development Certificati | 15/Aug/2022 - 10/Apr/2023

Be Practical Tech Solution - Bengaluru.

This certification was awarded after successfully completing a comprehensive course in Fullstack Web Developme covering technologies such as MongoDB, Express.js, React.js, Node.js, JavaScript, and Redux. The course included hands-on projects that provided practical experience in developing scalable web applications
