TECHNICAL SKILLS

- Html5 | CSS3 | JavaScript | React.Js | Redux Toolkit | SSMS | Jira | Confluence | GitHub | Babel | Parcel | JSX

EDUCATION

- **B.Tech. in Electronic & Telecommunication** from Don Bosco Institute of Technology, Mumbai with 8.49 CGPA in 2021

CORE COMPETENCIES

Software Development Lifecycle

Front-End Development

Project Management

Requirement Gathering & Analysis

Coding

Technical/ Functional Documentation

Client/ Stakeholder Engagement

Agile Methodology

Cross-functional Coordination

HEMANT KUMAR SUMAN

Result-driven professional with expertise in managing **Software / Web Application Development** by understanding the requirements; targeting assignments that enable the use of technical & leadership skills to positively contribute to the organization.

PROFILE SUMMARY

- Results-driven IT professional with 3+ years of expertise in Software Development, Front-End Development, React.js, and Project Management.
- Proficient in managing SDLC phases, including design, development, testing, and client support, with strong stakeholder engagement.
- Skilled in Agile methodologies, translating client requirements into functional specifications, and delivering tailored solutions.
- Hands-on experience with React.js, Redux Toolkit, JavaScript, C++, MySQL, HTML5, CSS, and tools like Jira, Confluence, and GitHub.
- Adept at data analysis, delivering actionable insights, and mentoring teams to ensure optimal performance and project success.

WORK EXPERIENCE

Since Oct'21: Capgemini India as Software Engineer (UI)

Growth Path:

Oct'21-Oct'22: Product Support Engineer → Since Oct'22: Software Engineer (UI)

Key Result Areas as Software Engineering Analyst:

- Designing and developing user interfaces and interactive components for point-of-sale systems, emphasizing responsive, user-centric, and efficient designs to streamline retail transactions.
- Building a product catalog with advanced search and filter capabilities, enabling seamless filtering by category, price range, and stock availability.
- Integrating cart management functionalities, allowing users to add / remove items efficiently using Redux Toolkit for streamlined global cart state management.
- Optimizing application performance through lazy loading and code splitting, significantly reducing load times and enhancing overall user experience.
- Collaborating with cross-functional teams to ensure seamless execution and on-time project delivery.
- Engaging with clients and end-users, gathering requirements, implementing feedback, and maintaining consistent follow-ups throughout the project lifecycle to address concerns and deliver tailored solutions.

Key Deliverables as Product Support Engineer:

- Partnered with cross-functional teams to guarantee on-time project execution and successful client delivery.
- Assisted in crafting test plans, monitoring progress, and upholding application standards for functionality, performance, and scalability.
- Creating detailed documentation in Confluence for common technical issues, enabling retail clients to independently resolve problems and reducing support ticket volume by an impressive 20%.

PROJECTS MANAGED

Title: OTT-GPT | Link: github.com

- Designed and engineered a movie search platform integrating TMDB API, Firebase, Redux-Toolkit, and OpenAI for personalized user recommendations.
- Enabled user registration and login functionality, allowing seamless access to curated movie recommendations based on dynamic search queries.
- Crafted an engaging and visually appealing user interface leveraging Tailwind CSS for a modern and responsive design.

Title: FOODAlux | Link: github.com

- Architected a high-performance food ordering application using React, Tailwind CSS, React Router, and Redux-Toolkit, seamlessly integrating Swiggy's Live API for real-time updates.
- Enhanced the user experience by applying shimmer effects, code chunking, and adhering to the Single Responsibility Principle for cleaner architecture.
- Integrated robust state management through Redux-Toolkit, ensuring efficient communication and functionality across components.
