

Sammek Sovitkar

Software Engineer (2 yr)

Phone: +91 8855802085

Email: sammeksovitkar1998@gmail.com

Profile

As a software engineer, I have 2 years of experience with various web technologies like **Javascript, ReactJs, NodeJs, Redux, HTML/CSS, jQuery, etc.** As we know, life is a learning process. In my free time, I try to learn new technologies and explore new ways of doing things. I have implemented some libraries in various projects like **expressJs, React-Redux, Axios, MongoDB, createjs, etc.** in my personal projects.

Technical knowledge

- Languages : Javascript, HTML, CSS, Java, Python
- Databases. : Sql, MongoDB,
- Web technologies : React-Js, Nodejs, Redux-Toolkit, React-Query, Express, Next JS, Restful API
- Other skills : Git, Jira Linux commands, Agile software development scrum,jira,
- Framework : React, Nextjs, ExpressJs, React Native, JQuery

Professional Experience

MITR Learning and Media Ltd. Mumbai

Role: React Js developer

Experience: 7 month

Period: 04/2024 - present

Point Matrix It Services Nashik (MH)

Role: Software developer

Experience: 1yr 5 month

Period: 11/2022 - 04/2024

Projects worked on In MITR

MITR Aksorn Project

- This Project focuses on e-learning activities, such as calculating the area of a circle, calculator, understanding tides due to gravity, and similar educational concepts. First, we display instructions to guide users through each activity.
- Then, we show animations to enhance understanding of the learning content. Following the animation, users take a test with questions related to the activity, such as questions about the area of a circle or tides due to gravity. Users submit their answers, and after submission, we display the correct answers along with explanations. This developed using React.js, TypeScript, Createjs ,Canvas, HTML, and CSS.

MITR Kornferry Project

- This project is related to blind people, in that blind people can handle applications using the keyboard tab key and arrow keys.
- The important term of the project is accessibility, using this user can handle the application.
- For accessibility, we use attributes like aria-label, arai-hidden, tab-index, etc., and build this application in jQuery, HTML, and CSS.

Projects worked on Point Matrix

TrackEasy Project

- The TrackEasy Project is a vehicle tracking and asset security system for company users, allowing the management of multiple assets such as cars, trucks, and school buses.
- Key features include live location tracking to display the current positions of vehicles on a map, and multi-vehicle tracking that shows multiple vehicle locations and draws polylines for each route.
- Additionally, the system maintains historical data for each vehicle, supports data management for vehicles, passengers, and drivers, and generates reports such as vehicle maintenance and driver performance reports on a date-wise basis.

Project Highlights:

1. **Account Management:** Handles company-specific accounts and asset data.
 2. **Live Tracking:** Displays the real-time positions of vehicles.
 3. **Multi-Tracking:** Shows multiple vehicle locations with route polylines.
 4. **Live Route Path:** Provides live route displays and historical route tracking on the map.
 5. **Vehicle and Company History Management:** Maintains comprehensive records of vehicles and related company assets.
- Technologies used include Ant Design for UI components, React Leaflet for map integration, MobX for state management, and Google Maps via API for enhanced map functionalities.

Qualification

Degree	Institute	University	Year	Percentage
MSc CS	Adarsh College Hingoli	SRTMU Nanded	2021	82%
Bsc CS	Adarsh College Hingoli	SRTMU Nanded	2019	71%

Certification

Full stack Development Course J-Spiders/ Q-Spiders Java Training and Development Center, Wakad Pune.

Languages Learn: C, JavaScript, Java, Python, HTML, CSS, J2EE

Strengths

Flexibility, Adaptability, Stress tolerance, Positive thinking, Honesty, Problem Solving Skills.

Personal information

Full name: Sammek Pravin Sovitkar

Address: Hinjewadi, Pune
