Professional Summary

Highly motivated UI Software Developer with over 2.5 years of experience specializing in Angular development and MEAN stack technologies. Proven ability to design and deliver responsive and optimized web applications, with additional expertise in quality assurance. Known for adaptability, problem-solving, and keen attention to detail. Seeking to leverage UI development skills to create impactful user experiences and contribute to organizational success.

Career Transition Context

Although officially designated as a Quality Engineer at LTIMindtree, I transitioned into a UI Software Developer role 2.5 years ago. In this capacity, I have successfully delivered production-level front-end applications, gaining hands-on experience in Angular, Node.js, and MongoDB. My designation on paper does not reflect my current skill set and responsibilities, which align with the role of a UI Developer. I am confident that my work portfolio and proven capabilities will resonate with the requirements of the position I'm applying for.

Professional Experience

UI Software Developer | LTIMindtree (June 2021 – Present)

Key Projects:

MMA Blue[i] Claims: - Developed a responsive chart application from scratch using MEAN stack technologies. - Designed dynamic user interfaces with HTML5, CSS3, JavaScript, and Angular. - Created and consumed REST APIs using Node.js, with complex business logic queries in MongoDB. - Improved application quality by implementing unit tests using Karma, achieving increased test coverage. - Resolved bugs and optimized the application by addressing SonarQube issues.

Velocity Service Centre: - Led the analysis and implementation of 30+ insurance applications, ensuring timely delivery. - Created detailed application requirements, test plans, and scripts, reducing testing time by 20%. - Automated critical functionalities using Apache POI Data-Driven Framework, decreasing manual testing by 15%. - Managed SLA data and performed daily health checks to ensure seamless integration.
