Frontend Developer Responsibilities for Crypto Presale Website

Core Responsibilities:

- **Frontend Development:** Build the website using Angular 16, HTML5, SCSS, and Bootstrap.
- **Data Visualization:** Implement a graph component using @swimlane/ngx-charts for data analysis.
- **Blockchain Integration:** Integrate the website with the Ethereum blockchain for transactions and smart contract interactions.
- **User Interface:** Create a responsive and user-friendly design that meets project requirements.
- **@wagmi Integration:** Use @wagmi's configureChains, createConfig, fetchBalance, and connect with TypeScript.
- **Testing:** Ensure the website is functional and bug-free through thorough testing.
- **Collaboration:** Work with designers and backend developers to meet project requirements and resolve JIRA tickets.
- **Documentation and Ticket Management:** Maintain IT documentation and manage tickets.
- **Continuous Learning:** Stay updated with the latest web development trends and technologies.

Trainee UI - 02/2022 to 01/2023

Yash Technologies Pvt Ltd.

As a Frontend developer, my main responsibilities included collaborating with Frontend, QA, and Backend developers to build web applications.

Client Project –Frontend Support (Domain- Data Science)

HTML5, CSS3, Bootstrap, SCSS, JavaScript, Angular 9, Typescript, Rest API, GoJS.

Technical Skills and Responsibilities:

- **Frontend Development:** Building web applications, designing user interfaces, developing frontend components, and integrating with backend APIs.
- **Cross-Browser Compatibility:** Ensuring web applications work seamlessly across different browsers and devices.
- **Version Control:** Using Git for code management, including updating the codebase, incorporating new features, and addressing bug fixes.
- **Quality Assurance:** Collaborating with the testing team to ensure code quality, functionality, and performance.
- **Agile Methodology:** Participating in scrum and retrospective meetings to align with project specifications and address challenges.
- **GoJs Expertise:** Resolving long-pending bugs related to the GoJs library and ensuring smooth functionality of diagrams and graphs.
- **Bug Tracking and Resolution:** Using Azure to track and resolve bugs and issues.

Soft Skills and Responsibilities:

- **Collaboration:** Working closely with Frontend, QA, and Backend developers to achieve project goals.
- **Communication:** Providing updates, discussing challenges, and collaborating with the team to find solutions.
- **Problem-Solving:** Identifying and resolving issues, improving functionality, and enhancing user experience.

Internal Project – Revamp Yash Intra Website

HTML5, CSS3, Bootstrap, JavaScript, jQuery.

- **Webpage Design:** Used HTML5, CSS3, Bootstrap, JavaScript, and jQuery to create SharePoint webpages.
- **API Interactions:** Utilized Postman for API integration.
- **Interactive Features:** Implemented JavaScript for drag-and-drop, toggle effects, tooltip on load, carousel, and flip-box functionality.
- **CSS3 Enhancements:** Used CSS3 for chat pop-up and grid system.
- **URL Optimization:** Employed relative URLs to reduce dependency on live URLs.
- **jQuery Integration:** Incorporated jQuery plugins for orgChart, horizontal timeline, and wScratchPad.
- **User Experience:** Optimized webpages for enhanced user experience.

Education

Post Graduate Diploma in Computer Applications: Computer and Information Science, Pune University.

Bachelor of Commerce, Pune University.
