KEERTHANARAJ M

REACT.JS DEVELOPER

Motivated React.js Developer with 2+ years of experience in building scalable web applications. Proficient in React.js, Redux, Node.js, and MongoDB, with expertise in responsive UI design, API integration, and real-time features using Socket.io. Seeking a permanent role to contribute my skills to a dynamic team.

WORK EXPERIENCE

Sankara Software Services Private limited, Chennai, [15th Nov 2022- Present]

PROJECTS

CGI Application

- Initiated and developed a CGI-based web application from scratch, migrating an existing ASP.NET project to React.js for improved performance and scalability.
- Implemented seamless monthly payment collection for installers, enhancing user experience and efficiency.
- Utilized TypeScript, React Hooks, Material UI, Axios, and Redux to ensure maintainable and scalable front-end architecture.
- Integrated external systems via RESTful APIs, enabling real-time monitoring of system production.

Project Hub (Project Management System)

- Developed a task management system for organizations, improving workflow efficiency and team collaboration.
- Designed and implemented two master screens as a full-stack developer, ensuring a user-friendly UI/UX.
- Used JavaScript, SQL, Node.js, Redux, and Material-UI to build a responsive and efficient system.

Chat Application (Internal Communication)

- Developed a real-time internal communication platform using React.js, Redux, Node.js, and SQL.
- Implemented WebSocket-based real-time messaging using Socket.io, ensuring seamless team communication.
- Designed and built a responsive UI with Material UI, enhancing cross-device accessibility.
