Experience

PathshalaHub

July 2022 - Present

Software Engineer (Front-End)

Remote

- Developed and implemented a robust admin panel, allowing admins to efficiently manage **testimonials**, **FAQs**, **inquiries**, and a catalog of over 500 **colleges** and **courses**, including detailed **application statuses** and **program information**.
- Contributed to the development of a **worker management platform**, implementing key features for managing worker profiles, assignments, and real-time status updates.
- Built the complete **user sign-up flow**, including authentication, form validation, and role-based access control, ensuring a seamless onboarding experience.
- Translated **wireframes** and **Figma designs** into pixel-perfect UI components, maintaining design consistency and responsiveness across devices.
- Actively applied **Agile methodologies** to prioritize tasks, deliver iterative improvements, and enhance collaboration within cross-functional teams.
- Worked closely with backend developers to integrate **RESTful APIs**, ensuring smooth data exchange and real-time updates, also coordinated with UX designers to implement a user-friendly and visually appealing interface.
- Developed and executed unit and integration test cases using Jest, achieving over **85%** code coverage, which significantly improved the reliability and stability of the frontend components.

Projects

Food Point | React.js, Redux-toolkit, Tailwind CSS | API: Swiggy API

- Designed and developed "Food Point," a food ordering web application utilizing React.js.
- Real-Time Swiggy API Integration: Seamlessly integrates live Swiggy API for up-to-date restaurant data, utilizing Redux Toolkit for state management and react-router-dom for routing.
- Intuitive Restaurant Display: Presents restaurants by area, cuisine, and ratings in a user-friendly interface, enhancing navigation with Redux Toolkit for smoother experience.
- Enhanced user interface with shimmer UI effects to provide visual feedback during data loading processes, improving overall user experience.
- Employed lazy loading techniques to optimize performance by asynchronously loading components and resources as needed, reducing initial load times.
- Developed custom hooks to encapsulate and reuse complex logic, promoting code reusability and modularity.
- Utilized Parcel bundler for efficient code bundling and asset optimization, improving application performance and load times.
- Conducted Unit and Integration testing through React Testing Library and Jest; with Test Case Coverage of 87%.

ConnectBook Landing Page | HTML, CSS

GitHub

- Developed a ConnectBook landing page replica using HTML to structure the content and custom CSS for styling, ensuring an accurate visual representation.
- Implemented responsive design principles using media queries to ensure the landing page displays optimally across various devices and screen sizes.
- Employed CSS techniques like hover effects and transitions to create a dynamic and visually appealing user experience.

Education

Chhatrapati Shahu Ji Maharaj University

Aug 2016 - Sep 2021

Bachelor of Technology in Electronics and Communication Engineering

Kanpur, Uttar Pradesh

Technical Skills

Languages: JavaScript, HTML, CSS, Java, C

Libraries/Frameworks: React Js, Redux-Toolkit, Redux Saga, Tailwind CSS, Bootstrap, Axios, React-Router-Dom, React Strap, Jest, Parcel, Babel

Developer Tools: VS Code, Git, Firebase, Figma, Canva, Netlify, IntelliJ

Certifications

Namaste React
