Summary

A results-driven **Frontend Developer** with over 2.5 years of hands-on experience in building dynamic, responsive web applications for the InsureTech sector. Adept at translating complex UI/UX designs into functional user interfaces using technologies like **ReactJS**, **HTML5 CSS3**, and **JavaScript**. Recognized for delivering high-quality software solutions, optimizing performance, and ensuring cross-browser compatibility. Seeking a challenging role to leverage my skills in frontend development and contribute to the success of a growth-focused organization.

Work Experience

Software Engineer
Renewbuy, Gurgaon

(10/2022 - Present)

- Developed and maintained a Partners (Agent) Payout System using React.js to manage financial transactions.
- Implemented a secure and efficient payout workflow, ensuring seamless pay-ins from insurers and payouts to partners
- Designed and integrated an Approval Matrix and Escalation Rules to streamline payment approvals and issue resolutions.
- Developed a rule execution engine to automate business logic, improving efficiency and reducing manual interventions.
- Optimized UI/UX for better user experience, ensuring mobile responsiveness and accessibility.
- Worked closely with backend teams to integrate APIs and enhance system performance.
- Used Redux, Context API, and performance optimization techniques for a smooth frontend experience.

Key Achievements:

- Recognized as **Employee of the Quarter** for outstanding contributions to frontend development.
- Awarded for **Teamwork and Problem-Solving** during a system outage, resulting in a swift resolution and minimal operational disruption.

Technical Skills

- Frontend:** React.js, Next.js, Javascript (ES6+), TypeScript, Redux, Context API
- UI & Styling:** HTML5, CSS3, Tailwind CSS, SCSS, Bootstrap
- API Integration:** RESTful APIs, GraphQL, Axios, JWT Auth
- Performance & Optimization:** Lazy loading, React.memo, useCallback, useMemo
- Testing & Debugging:** Jest, React Testing Library, Chrome DevTools
- Tools & Deploye:** Git, GitHub, CI/CD, Docker, Vercel, Netlify

Projects

AI-Powered Chatbot for Real-Time Conversations

- Tech Stack:** React.js, JavaScript, Tailwind CSS, Gemini API, Axios, Context API
- Designed and developed a responsive AI-powered chatbot using React.js for the frontend.
- Integrated Google Gemini API to process user queries and generate human-like responses.
- Utilized Axios for API calls and implemented error handling for seamless communication with the backend.
- Used Context API to manage state efficiently, improving app performance and maintainability.
- Enhanced user experience with an intuitive UI, interactive chat interface, and smooth animations.
- Implemented local storage to persist chat history, allowing users to revisit previous conversations.
- Ensured the application was mobile-friendly and optimized for different screen sizes.
