- Implemented a responsive website for **Boston Financial**, optimizing regional content for India, USA, and UAE, resulting in a **35% boost in user engagement**.

Education

Dr. A.P.J. Abdul Kalam Technical University, Bachelor of Technology in Computer Science & Engineering CGPA: 7.5/10 Aug 2019 – Sept 2023

Personal Projects

AI-Powered Python Tutor for Kids :

[Source Code](#) | [link](#)

Developed an interactive **AI tutor** to make Python learning fun for children.

Integrated Google **Gemini API** to generate kid-friendly explanations and responses.

Designed gamified lessons with engaging visuals and progress tracking.

Implemented AI-driven prompts like *"Explain loops with a superhero story!"* for better understanding.

Built using React.js, Tailwind CSS, and Vite, ensuring a smooth and responsive UI.

Full Stack EdTech Plateforme (In Development) :

[Source Code](#) | [link](#)

Developed a **full-stack Learning Management System (LMS)** using **ReactJS**, **Express**, **Node.js**, and **MongoDB** to provide a platform for course creation, management, and learning.

Implemented **user authentication** (login/signup) with secure password handling and JWT-based session management.

Built a **responsive UI** using **TailwindCSS** and integrated **Redux Toolkit (RTK Query)** for efficient state management and API handling.

Created **role-based access control** (Admin, Instructor, Student) with protected routes for secure navigation.
