Skills

Frontend	JavaScript, TypeScript, HTML/CSS, Bootstrap, React, Redux, Material UI, Rekit, Tailwind, TanStack, Next.js	Microservices	Docker Compose, CI/CD
Backend	Node.js, Express.js, MongoDB, SQL Basics, Firebase, Supabase, Redis, RabbitMQ, NGINX, NestJS	AI/ML	Generative AI, LangChain, Pinecone, RAG
Cloud	AWS (S3 Storage, Lambda, EC2, SNS), Docker,	Payments	Stripe, PayPal
		Authentication	JWT, Firebase Auth, OAuth, Bcrypt, Passport.js, Auth0
		Tools	Git, DockerHub, Postman, MongoDB Compass, Studio 3T, VS Code, Sublime Merge, Asana

Experience

LCNC Technologies Private Limited

Full Stack Developer

August 2023 – Present

Noida, India

- Developed key features for Drapcode, enhancing user engagement.
- Collaborated with cross-functional teams to translate requirements into scalable solutions.
- Utilized MERN stack to ensure high performance and reliability.
- Contributed to product roadmap planning and technical feasibility assessments.
- Optimized system performance to enhance scalability and stability.

HardCipher Private Limited

Full Stack Developer

2022 – 2023

Noida, India

- Led MERN stack projects, ensuring seamless integration for dynamic web applications.
- Developed scalable server-side solutions with Node.js and Express.js, optimizing performance.
- Collaborated cross-functionally to deliver user-centric solutions, meeting client deadlines.
- Designed intuitive user interfaces with React, Redux, Firebase, and Supabase, enhancing user experience.
- Contributed to code reviews and troubleshooting, ensuring high-quality, efficient code.

Masai School

Full Stack Web Development Training

2021 – 2022

Bangalore, India

- Completed a rigorous 9-month program focused on full-stack development.
- Gained hands-on experience in building scalable web applications using the MERN stack.
- Developed projects that emphasized real-world application of coding concepts.

Projects

Drapcode – No-Code Platform (Professional Project)

- Designed and implemented a seamless onboarding system with role-based access control and advanced user authorization.
- Built and integrated core platform features, including:
 - No-code backend systems and customizable themes for UI design.
 - Plugins for SMS and mail services, enabling users to easily integrate communication capabilities.
 - External JS and CSS CDN integration to allow users to add custom scripts and styles to their applications.
 - Enhanced platform performance by resolving bugs, optimizing features, and improving workflows.
- Contributed to the development of the **Drapcode Developer SDK**, empowering external developers to extend and customize the platform.

CryptoTracker (Personal Project)

React, Node.js, Express.js, MongoDB, Firebase, Material UI, Cloudinary

- Developed a sleek and user-friendly React web application.
- Implemented features like JWT-based signup/login, CRUD operations, and a watchlist for favorite cryptocurrencies.

Education

Ayodhya Prasad Mishra Mahavidyalay, Kanpur University

Bachelor of Science

2020 – 2023

Unnao, India

Masai School

Full Stack Web Development Course

2021 – 2022

Online
