Education

SSBT'S College of Engineering & Technology, Bambhori

2018 – 2022

Bachelor of Engineering in Computer Science CGPA: 8.70

Jalgaon, Maharashtra

Dr. Annasaheb. G. D. Bendale Mahila Mahavidyalaya

2016 – 2018

12th in Science 62.07

Jalgaon, Maharashtra

Technical Skills

Languages: C/C++, HTML/CSS, JavaScript, MYSQL, OutSystems

Frameworks: Angular, React, Service Studio

Developer Tools: VS Code, Service Studio, GIT, Github, MS Office 365

Experience

Syntel Pvt.Ltd.

Oct 2022 – Jan 2025

Associate Consultant

Pune, Maharashtra

- **Designed the user interface for Eviden Meta-verse Web-portal using Angular 17** which streamlined event management process, boosting **efficiency by 80%**.
- Developed a **web-based application** using the **Outsystems low-code platform** to streamline workflows and enhance productivity for financial services teams by integrating **task management, document processing, and client communication modules**.
- Worked closely with diverse teams to develop a secure, scalable, and **responsive solution** featuring role-based access controls, ensuring seamless performance across both **desktop and mobile devices**.
- **Collaborated with cross-functional teams and clients to gather requirements** and design documentation tailored to **client specifications, conduct testing, and deploy the developed applications**, ensuring alignment with business objectives and user needs.
- Provided **quick and effective resolutions to clients** as well as answered with **immediate redirections of up to 15 calls daily** resulting in **100% customer satisfaction**.

Projects

AXOS Professional Workstation (APW)

- Built a fully integrated web application using the Outsystems low-code platform for **Axos**, a professional workstation system aimed at optimizing workflows and **boosting productivity for financial services teams**.
- The project involved building and integrating various modules such as **task management, document processing, and client communication**, ensuring seamless user experiences and robust performance.
- Worked closely with cross-functional teams to develop a secure, scalable, and responsive solution that fulfilled client needs while adhering to industry standards.
- Additionally, implemented role-based access controls and optimized the application for both desktop and mobile use.

Eviden Metaverse Webportal

- Developed and designed a **metaverse web application using AngularJS** for a dynamic and responsive frontend.
- Implemented interactive **UI components with HTML, CSS, and JavaScript** to enhance user experience and engagement. Built a robust **backend using Node.js**, enabling efficient handling of user requests and real-time data processing.
- Managed database operations with PostgreSQL, structuring data to **support user profiles, virtual assets, and metaverse interactions**. **Deployed API on Amazon EC2, using PM2 for process management** to ensure high availability, scalability, and reliability.
- Worked with cross-functional teams to seamlessly integrate frontend and backend components, enhancing system performance and functionality. Implemented best practices for security and performance through data validation and optimization strategies.

Achievements / Certificates

- **AZ-900 Certified** - 2022
- **Certified Associative Reactive Developer (OutSystems O11)** - 2023
- **Certified Associate Developer (ODC)** - 2024
- **Certified Mendix Rapid Developer Certification** - 2024
