SUMMARY

Immediate Joiner and Result Driven web developer with **2 years** of leveraging expertise in **HTML, CSS, JavaScript, Angular** to design and develop innovative web solutions that meet client needs.

SKILLS

Technologies	HTML, CSS, JavaScript, Angular, JSON, TypeScript, Python (Flask), Python, UX/UI, Postman, Wireframes
Frameworks	Angular, Express.js, Node.js
Databases	MongoDB, NoSQL, MySQL, PostgreSQL
Version	Git, GitLab
Testing	Jasmine, Karma, Cypress (E2E testing)
Methodologies	Scrum based Agile

PROFESSIONAL EXPERIENCE

Mean Stack Intern | ApnaBot, India

16th July 2024 – 10th Oct 2024

- Worked with the clients of the Apna Bot chatbot platform as a Mean stack developer and exhibited my expertise in **Angular, HTML, CSS, JavaScript**.
- Worked closely with clients to understand their specific requirements, translating business needs into technical specifications for tailored features.
- Implemented a user-friendly front-end interface using **Angular**, enabling users to log hours, track time spent on specific projects, and view reports on daily, weekly, or monthly activity.
- Collaborated with the team to identify user needs and iterated on the application’s design to improve usability based on feedback.

Software Developer | Quantiphi Analytics Solution Pvt Ltd, India

19th Nov 2021– 22nd Nov 2023

- Developed User Interface (UI) applications and professional web applications using **HTML, CSS, JavaScript, Angular Node.js, Express.js and Bootstrap**.
- Collaborated with business analysts to understand business requirements and converted mock ups or wireframes into single page applications using **HTML5, CSS3, Bootstrap, JavaScript** and **Angular**.
- Built dynamic user-centric web applications using Angular, leveraging core modules like **FormsModule,HttpClientModule and RouterModule** for efficient data binding ,client-side routing ,API integration ,and form handling .
- Created **reusable components** managed data with **services and dependency injection** and implemented client-side routing for smooth navigation.
- Implemented form validation and handled user input through reactive or template-driven forms, ensuring effective communication with APIs using **HttpClient**.
- Utilized **REST APIs** for seamless data communication between the client and server.
- Optimized performance wrote **unit tests** using Jasmine & Karma framework for key modules, and ensured the application adhered to **security and industry best Practises**.

Software Developer Intern | Quantiphi Analytics Solution Pvt Ltd, India

19th July 2021 – 19th Nov 2021

- Worked closely with UX/UI designers and senior developers to understand project requirements and contribute ideas for improvement. Gained knowledge and experience in Angular component driven architecture, utilizing services, directives for efficient code structure and reusability.

- Creation Participated in Agile methodologies including daily standups, sprint planning and code reviews, while receiving mentorship from senior developers.
- Troubleshoot and **fixed bugs** and issues in the UI to ensure **smooth operation** of the applications.

Projects

ICAD Web App Project

- Created an Enterprise Full stack application for the ICAD team enabling seamless management of configuration settings for cutting edge-client software utilized in cancer detection.
- Assisted in implementing role-based access control for the application granting specific feature and functionalities to different user categories including ICAD Admins, Institutional Super Users, Site Users and Application Users.
- Transformed wireframes into sleek, responsive UI designs using **Angular, HTML, CSS, JavaScript, TypeScript** and **Bootstrap** to create user friendly web interfaces. Focused on smooth functionality and maintaining a clean, maintainable codebase to deliver seamless user experience.
- Transformed Conducted unit testing using Jasmine and Karma testing frameworks.

Custom Translation for State of Illinois

- Designed a Custom Translation Service for the Department of Innovation and Technology to help translate the agency’s various assets in the form of documents, PDFs across multiple languages.
- Assisted Provided front-end support for a web application built with **Angular, HTML, CSS and JavaScript**, ensuring, smooth functionality, resolving UI issues and optimizing performance.
- Enabled customers to upload documents in various formats like pdf, docs, text, rtf and convert them into various other languages like English, Hindi, Polish, Arabic, Spanish using Google Translation API.

EDUCATIONAL QUALIFICATIONS

FR CONCEICAO RODRIGUES COLLEGE OF ENGINEERING, MUMBAI UNIVERSITY
2017-2021, 9.26 CGPA

CERTIFICATIONS, TRAINING & ACHIEVEMENTS

- Associate Google Cloud Engineer -Google Issued Feb 2022.
- Mastering MEAN.JS: Full stack Ultimate Course - June 2024
