Professional Summary

A Senior Front-End Engineer with over 7.4 years in JavaScript, UI engineering, and architecture. Skilled in React JS. I have spoken at various tech events.

Skills

- JavaScript, Typescript, React JS, Redux, MobX, HTML5, CSS, SASS
- Web Development, Web Design, PWA
- Material UI, Ant Design, Bootstrap
- Axios, REST API, GraphQL, Git, AWS Amplify, Jenkins
- WebPack, Micro-frontend, Module Federation
- Mocha and Jest frameworks for Unit testing, UI testing, CI/CD

Experience

Software Engineer December 2021 - Current
Tekion

- Led the Front-End Team to set up Module Federation for the Core module, impacting over 70 apps
- Owned two major apps, Employee Hours and Campaigns, built with React JS, with full end-to-end ownership and sprint feature delivery. Mentored a team of front-end developers
- Enhanced PDF reports with customizable options, boosting satisfaction, efficiency, and ease of use for over 100 dealers
- Reduced production issues by 90% through writing unit tests and component test cases
- Maintained standards via PR reviews, lowering issues in stage and pre-production

Software Engineer October 2020 - November 2021
Get My Parking

- Improved UI/UX with critical enhancements, managed successful deployments, and quickly resolved bugs to deliver a stable product within the first 4 months of onboarding
- Led front-end development for a parking management dashboard app using React JS, creating a smooth user experience and adding white-labeling options for the consumer app, which earned a 5-star rating from European clients

Front End Developer February 2019 - October 2020
Wiggles

- Built a consumer-focused website to sell veterinary services and products using React JS. Created an end-to-end test suite using Katalon, reducing manual testing by 95% and greatly improving reliability
- Built a PWA for a mobile app for veterinary doctors and a desktop solution for customer care from scratch using React JS. Handled everything single-handedly, including gathering requirements, designing, coding, testing, and delivery
- Worked on automating email and invoice processes, reaching over 10,000 clients and customers daily

Front End Developer January 2018 - February 2019
Apptyx

- Built a user-focused real estate web portal with React JS

- Designed web app with Bootstrap for a modern feel
- Integrated APIs smoothly to enable efficient data communication

Education

Bachelor of Technology in Electronics And Telecommunication - Atharva College of Engineering, University of Mumbai

January 2018

Awards

- One Team Award: Recognized for successful implementation of module federation for Core app
- Customer Focus Award: Awarded for adapting Employee Hours project to meet European market needs, expanding features beyond U.S

Certifications

- Namaste Frontend System Design
- Front-End Developer Professional Certificate
