My expertise in project management, office software, and social media management has improved since I earned my Master's degree in Business Psychology and Management. I have developed a strong grasp of organizational dynamics, human behavior, and efficient problem-solving techniques via voluntary work and academic projects. This background has equipped me to handle challenging situations and provide significant answers in fast-paced settings.

I have practical experience planning effective networking events for foreign workers looking for employment and career advancement in Germany as a results-driven marketing specialist. My abilities include social media management, content marketing, and Canva expertise. I have a track record of boosting sales, lead generation, and brand exposure. I am seeking a challenging role that will allow me to leverage my expertise and contribute to a dynamic team.

Projects and Assignments

Organised and Facilitated Expatriate Networking Events and Career Guides

06.2024- Ongoing

- **Expanded Professional Networks**: Spearheaded regular networking events and career guides in Frankfurt, catering to a diverse expatriate community. Topics ranged from industry-specific insights to cultural exchange and career development.
- **Content Creation**: Demonstrated strong content creation skills by producing social media posts, blog articles, and email newsletters based on event themes.
- **Community Engagement**: Successfully fostered a sense of community and facilitated valuable connections among expatriates.

Business Stimulation Project

08.2023-01.2024

Led the team as a Consultant Strategic Director in a business simulation (virtual company management). Collaborated with a team to identify problems and develop solutions, including creating a company logo to establish brand identity.

Center Parcs: Business Project

02.2023-07.2023

Through research-driven referral strategies (improved efficiency) and market analysis informing strategic decisions (industry trends & competitor benchmarks). Tackled complex recruitment challenges with effective solutions (researcher & interviewer).

Bosch: Group Design Thinking Competition

01.2022-31.2023

Developed innovative "Phygital" retail solutions for cooktops, empowering customers with independent product exploration and pricing information and reducing reliance on staff. Leveraged market research (consumer preferences & trends) to inform strategic decision-making. The project honed critical thinking (user needs, cost-effectiveness), adaptability (technical challenges, user feedback), and rapid learning skills.
