Full-stack developer with 8 months of experience, seeking a full-time role.

EDUCATION

University of Mumbai, Bachelor of Science with Computer Science | Mumbai, India GPA: **9.0 / 10.0** June 2024

Language: **Python, C++, Java, Javascript, HTML, CSS & MERN**

Courses: Linear Algebra, Operating System, Data Structure and Algorithm, Basics of Artificial Intelligence

EXPERIENCE

Solytics Partners, Frontend Developer Consultant | Remote (Pune, India) Aug 2024 - Present

- Developed a scalable web application from scratch using **React, Redux Toolkit**, and **Axios** for API integration.
- Created interactive visualizations using **Chart.js, Nivo**, and **MUI X Charts** to enhance user experience and data representation.
- Implemented state management solutions with **Redux** and **React-Redux** to optimize application performance.
- Utilized **Formik** for efficient form handling and validation, ensuring robust user input management.
- Leveraged **Lodash** and **Moment.js** for streamlined data manipulation and date management.
- Developed responsive layouts using **MUI** and **SCSS**, adhering to best practices in user interface design.
- Collaborated with cross-functional teams, effectively communicating technical concepts to non-technical stakeholders.
- Conducted thorough testing using **Jest** and **React Testing Library** to ensure application reliability and performance.

Solytics Partners, Frontend Developer Intern | Remote (Pune, India) Feb 2024 - Aug 2024

- Developed and maintained responsive web applications using **React, Material UI**, and **SCSS**.
- Gained hands-on experience with version control systems like **Git**.
- Maintained code quality by debugging issues and managing **ESLint** configurations.
- Utilized **Formik** for form management, **Moment.js** for date manipulation, **Lodash** for utility functions, and **PropTypes** for type checking in React applications, **Redux** for state management.
- Implemented **Redux Toolkit** for efficient state management and streamlined application architecture in React projects.

SKILLS

Languages **JavaScript, Python, C/C++, Git**

Backend Technologies **MERN Stack (MongoDB, Express, React, Node.js), Next.js, Django**

Software Development **Agile Methodologies, Version Control, Documentation**

PROJECTS

Connectly - Social Media Management Platform

- Developed a full-stack application using **MERN** stack, enabling users to seamlessly manage multiple social media accounts from a single dashboard.
- Implemented **JWT authentication** and role-based access control to enhance security and user experience.
- Created a responsive UI with **Material-UI** and custom components to ensure an intuitive user experience across devices.
- Integrated real-time notifications and analytics features, allowing users to track engagement metrics and optimize content strategy.
- Utilized **Node.js** and **Express** to create RESTful APIs, enhancing data handling efficiency and scalability.

Blood Bank Management System - Web Application

- Designed and implemented a comprehensive **Blood Bank Management System** using **Django** and **PostgreSQL** for efficient data storage and retrieval.
- Developed user-friendly interfaces for donors and administrators, facilitating easy registration, blood donation tracking, and inventory management.
- Integrated an **automated notification system** to alert users of donation drives and blood shortages, enhancing community engagement.
- Ensured data security and privacy compliance by incorporating robust user authentication and authorization protocols.
