EXPERIENCE

Infosys

Digital Specialist Engineer

Pune, India

Oct 2021 - Current

Developed and enhanced key journeys of the @Work application.

- **UI & Frontend Development:** Designed and developed intuitive, user-centric interfaces with comprehensive validation, reducing user errors by 25% and improving accessibility. Led the modernization of a legacy application, introducing dynamic table sorting, pagination, and advanced data filtering in React.js to improve usability and efficiency.
- **Performance Optimization & API Integration:** Integrated RESTful APIs with optimized response handling, leveraging caching and debouncing to reduce redundant API calls by 40%. Enhanced data exchange efficiency by 30%, leading to a 20% reduction in page load times. Improved API performance through batch requests and payload optimization.
- **Scalability & Responsive Design:** Developed a responsive UI using the OneDLS framework, ensuring cross-device compatibility and delivering a seamless user experience across 18 global markets. Built modular, reusable React.js components, improving scalability, maintainability, and performance.
- **State Management & Personalization:** Implemented Redux for centralized state management, streamlining localization and improving data handling across 10+ international markets. Enhanced user experience by adding personalization features such as bookmarks, recent searches, and persistent preferences using cookies and local storage.
- **SEO & Web Performance Enhancements:** Optimized Core Web Vitals (LCP, CLS, FID) by implementing image optimizations, lazy loading, and code splitting, reducing initial page load times. Implemented SEO best practices in React.js using React Helmet, structured metadata, and preloading techniques to boost performance in high-traffic environments.
- **CI/CD & Deployment:** Developed and deployed a single-page application (SPA) using React, integrating CI/CD pipelines with Jenkins, GitHub Actions, and XL Release for automated testing and seamless deployments. Implemented Lighthouse audits, bundle size monitoring, and Storybook previews to ensure performance and UI consistency.
- **Micro-Frontend Architecture:** Developed and maintained independent, scalable micro-frontends using Single-SPA and Webpack Module Federation, enabling modular architecture and independent deployments. Improved cross-team collaboration by creating shared UI components and business logic modules.
- **Collaboration & Leadership:** Worked cross-functionally with product, design, and backend teams to enhance homepage functionality and user workflows. Mentored junior engineers, improving code quality through structured code reviews and knowledge-sharing sessions.
- **Testing & Bug Resolution:** Developed Jest unit tests achieving 95% coverage, proactively identifying and fixing critical bugs to enhance application stability and reliability.

SKILLS SUMMARY

- **Frontend Development:** HTML, CSS, Tailwind CSS, Material UI, JavaScript (ES6), React.js, Redux, Sass
- **Testing & Automation:** Jest, React Testing Library
- **CI/CD:** Git, Docker, Jenkins, GitHub Actions
- **Software Development:** DBMS, Data Structures, Algorithms, OOP, Web Development, Rest API
- **Tools & Platforms:** Rally, VSCode, Linux

ACADEMIC PROJECTS

- **MSME (GST return):** Designed and developed a full-fledged UI for MSME users to file GST returns. Built the entire SME project in just 36 hours, focusing on a seamless and efficient user experience. Resolved common tax filing issues by implementing intelligent form validations, auto-formatting, and clear error messages, reducing submission errors by 30%. The platform's ease of use significantly improved adoption rates, helping small businesses file returns effortlessly.

ACHIEVEMENTS AND CERTIFICATIONS

- Infosys - Rookie of the Quarter and Eureka Award 2024: Recognized for enhancing frontend performance by optimizing API response times and UI responsiveness.
- Infyqt - Infosys Certified Software Programmer.
- Smart India Hackathon 2019 Winner - Software Edition 2019.
- Finalist in VOID HACKS Indore 2019.

EDUCATION

- **Lakshmi Narain College of Technology**
B.Tech - CSE; CGPA: 8.9

Bhopal, India
Aug 2017 - May 2021
