SUMMARY

Web Developer with 3 years of hands-on experience in designing, developing, and maintaining web applications. Adept in both front-end and back-end technologies, with a solid understanding of HTML, CSS, JavaScript, and popular framework like Angular. Experienced with server-side language such as Node.js as well as database management systems like MySQL and MongoDB.

PROFESSIONAL EXPERIENCE

2022 - 2025

Mysore

• Software Developer

VARSHA CABLES PRIVATE LIMITED

- Varsha Cables has been a leading manufacturer of electrical cables and has an enviable reputation for quality of its products. Varsha Cables is already an established brand in the instrumentation, data cables and low ampacity power and control cables.

PROJECTS

Cable Manufacturing Process Dashboard

📅 2022 📍 Mysore

The Wire Manufacturing Process Dashboard is an interactive, real-time monitoring system designed to track and optimize wire production operations. This dashboard will help manufacturers improve efficiency, reduce downtime, and ensure quality control by providing insights into key production metrics.

- **Tech Stack:** HTML, CSS, JavaScript, Node.js, MongoDB, and WebSockets for real-time updates.
- Developed the real-time data visualization with graphs and charts.
- Tracking the machine efficiency and downtime.
- Provide historical data for trend analysis and predictive maintenance
- Enhance decision-making through data visualization and reporting.

Customer Feedback & Quality Assurance Portal

📅 2024 📍 Mysore

The **Customer Feedback & Quality Assurance Portal** is a web-based platform designed for cable manufacturers to manage customer feedback, quality assurance processes, and issue resolution. The portal allows customers to submit complaints, provide feedback on cable products, and track the resolution status. It also enables manufacturers to analyze quality trends and enhance customer satisfaction.

- **Tech Stack:** HTML, CSS, JavaScript, Node.js, MongoDB.
- Provide a structured system for collecting and managing customer feedback.
- Improve quality assurance by tracking and resolving reported issues.
- Analyze feedback trends to identify areas for product improvement.
