

Sanjan Harihar Sawant
Sr. Software Developer
sanjan.sawant30@gmail.com
+918779245740

Professional Summary:

- Around 7 years of experience in developing web pages using HTML5, CSS3, SASS, LESS, JavaScript, React JS, Redux, jQuery, XML, JSON, Node.js, Ajax, Twitter Bootstrap.
- Implementation and Maintenance, and extensive experience with Agile and SCRUM.
- Extensive experience in building SPAs with React.js, JSX, React Nesting Components, Hooks, React-Router, Context API, Redux, middleware libraries including redux-thunk.
- Experienced in React JS and working with Redux.
- Responsive Web Design – developed responsive web applications with CSS Media Queries and Bootstrap 3/4.
- Able to use AJAX, Axios and Fetch to send asynchronous http requests.
- Good Expertise in analyzing the Document Object Model (DOM) Layout, DOM Functions, and JavaScript functions, Developer Tool Bar.
- Experienced in working with Redux architecture using complex Object-Oriented concepts in improving the performance of the websites.
- Experience in using React JS components, Forms, Events, Keys, Router, plus Redux.
- Good Experience in React.js for creating interactive UI's using One-way data flow, Virtual DOM, JSX.
- Familiar with creating Custom Reusable React Components Library.
- Experience working with content management systems like AEM and HubSpot.
- Experienced in working with Node.JS and NPM modules.
- Involved in writing application-level code to interact with APIs, RESTful Web Services using AJAX, JSON.
- Knowledge of utilizing cloud technologies including Amazon Web Services (AWS).
- Expertise in video coding by using HTML5, CSS3 and JavaScript.
- Experience with front-end development with back-end system integration.
- Good Experience in Bug tracking tools like JIRA, and Asana.
- Experience in Version Control tools like GIT.
- Expertise in using IDE tools such as VSCode, Eclipse, Sublime Text Editor, and IntelliJ IDEA.
- Ability to work effectively while working as a team member as well as individually.
- Excellent communication and Inter-Personal Skills, well organized, goal oriented.

Technical Skills

Web Technology	React JS, Redux, TypeScript, TanStack Query, HTML5, CSS3, LESS, XML, JavaScript, AJAX, jQuery, JSON, Twitter Bootstrap, Next.js, Node.js, GitHub
-----------------------	--

Development tools	VS Code, Eclipse, Sublime, IntelliJ
Methodologies	Agile
Database	MONGO DB, PostgreSQL

Work Experience:

Enfuse Solutions - India.
Role: Technical Consultant UI

Dec 2024 – Present

Responsibilities:

- Developing an Invoice Application from scratch using React.
- Implementing client-side routing with react-router-dom to create a single-page-experience.
- Integrating Axios to make API requests to the backend services.
- Implementing loader and action functions in react-router-dom for data fetching and form submission within route definitions.

Environment: React, Redux, HTML5, CSS3, JAVASCRIPT

Oriana Software Solutions - India.
Role: Senior Software Developer

Apr 2023 – Mar 2024

Responsibilities:

- Helped to build admin dashboard for the Run application using modern ES6+ features, including arrow functions, template literals, destructuring, spread operators, and modules.
- Worked with Component life cycle methods, forms (Formik and Form from react-router-dom), events, states, props, keys, and routes.
- Used TanStack/React-query to keep front end data in sync with the backend API.
- Integrated RESTful APIs to fetch and display data in real-time.
- Worked collectively with backend developers to define API specifications, and to establish seamless connection with the UI.
- Performed state management using redux toolkit and Context API.
- Used react-router-dom package extensively to make this dashboard a single page application.

Environment: React Hooks · ES6 · React Router · React Router · Redux toolkit · TanStack Query · Material UI · REST APIs

Mahaugha LLC - Cranbury, NJ, USA
Client: NetJets
Role: Software Developer

Sept 2022 – Jan 2023

Responsibilities:

- Worked on rewriting the SOCTRACK application built on Grails-app in React.
- Collaborated on agile development team to design Single Page Application using ReactJS for the users to view multiple dashboards and made use of react-router to navigate between different dashboards in the application.
- Consumed RESTful Web Services to get information from database.
- Implemented Unit tests and conducted code reviews to ensure code quality and maintainability.
- Participated in Agile development process, including sprint planning, and stand-ups.
- Managed state using the Redux store for app wide state management.
- Utilized Okta react libraries for user authentication.

Environment: React Hooks · Redux · React JavaScript · REST APIs · JavaScript

Atlas Search LLC - NYC, NY, USA

Mar 2022 – Sept 2022

Client: Dataminr

Role: Web Developer

Responsibilities:

- Design, develop and test HTML5, CSS3, Bootstrap, JavaScript, and jQuery that meet accessibility and web browser standards for website.
- Developed editable templates and modules in HubSpot to be later used by authors for editing purposes.
- Designed CSS templates for use in all pages on the website working with CSS Background, positioning, text, border, margin, padding, and table.
- Used Web services (RESTful) for transmission of large blocks of JSON.
- Extensively used HubDB API to update records in the HubDB table.
- Since editing and deleting records were not allowed from HubSpot modules, I had to create a separate server to do the same.
- Called the Restful web services calls for POST, PUT, DELETE and GET methods.

Environment: HubSpot, HTML 5, CSS3, Sass, Less, JavaScript, Bootstrap, Ajax, React JS, Redux, MySQL, XML, JSON, GitHub, Restful API, AWS, JIRA, and Jasmine.

Webject Systems Inc - Bridgewater, MA, USA

June 2020 – Mar 2022

Client: Biomedtrix LLC

Role: Software Applications Developer

Responsibilities:

- Worked on radiographic analysis for veterinarians to use before surgeries to determine implant sizing and positioning for multiple surgical procedures.
- Used React and Redux to create a web application for veterinarians to help with various animal surgeries.
- Worked on an Agile (Scrum) Development Team to deliver regular updates to business team and project managers.
- Implemented stable React components and stand-alone functions to be added to any future pages.
- Have worked on AWS to integrate the server side and client-side code.

- Implemented React container and presentational components (as Stateless and Functional components when applicable).
- Implemented various screens for the front end using React.js and used various predefined components from NPM (Node Package Manager) and redux library.
- Worked on React JS Virtual Dom and React views, rendering using components which contains additional components called custom HTML tags.
- Worked in using React JS components, Forms, Events, Keys, and Router.
- Experience in RESTful web services to integrate between Server side to Client Side
- Handled cross browser/platform compatibility issues (IE, Firefox, and Safari) on both Windows.

Environment: React JS, Redux, JavaScript, Jest, and GitHub.

Mountain Ltd – New Gloucester, Maine, USA

Mar 2018 – May 2020

Client: KPMG US

Role: Java Developer

Responsibilities:

- Developed web components for use in AEM/CQ 6.3 by using JavaScript, Java, XML, HTML5, LESS
- Developed sites via Development Sprints by setting up the code environment, created/coded page templates and components, worked on AEM configurations, conducted team code reviews.
- Provided code support upon launch of the site, made enhancements such as Search Engine Optimization.
- Developed a flash briefing skill API to be fed to Amazon Alexa. Created this application for authors to add contents on the website. Developed this application using MEN Stack
- Communicated with the client to understand the requirements of the website, gained experience in project planning.
- Involved in writing application-level code to interact with APIs, Web Services using AJAX, and JSON.
- Implemented user interface guidelines and standards throughout the development and maintenance of the website using JavaScript, jQuery, CSS and HTML.
- Implemented and designed user interface for web-based customer application.
- Enhanced and built reusable components across different modules using Custom directives and CSS classes.
- Created Responsive Designs (Mobile/Tablet/Desktop) using HTML&CSS, Bootstrap.

Environment: AEM 6.3, HTML5, CSS3, JavaScript, JQUERY, Java, AJAX, JSON, XML, and INTELLIJ.

Genius Plaza - NYC, NY, USA

May 2017 – July 2017

Role: Frontend Development Intern

Responsibilities:

- Developed and updated the web pages using HTML5, CSS3, ES6, Twitter Bootstrap, JavaScript, and JQuery.
- Used JavaScript, AJAX and jQuery to create efficient and dynamic web forms and web applications.

- Created React.js web components for static and dynamic web-pages, Redux(3.6.0) for state manipulations, and developed navigation function for SPA with React-Router library

Environment: HTML5, CSS3, JavaScript, AJAX, JSON, React JS, and Redux.

Education:

Bachelor of Engineering in Electronics Engineering - 2013, Mumbai University, India

Master of Science in Computer Engineering – 2016, Stevens Institute of Technology, USA

Master of Business Administration in Information Technology – 2021, Goldey Beacom College, USA

Certifications:

The Web Developer Bootcamp 2022 - Udemy August 2024

The Modern React Bootcamp - Udemy Dec 2021

Mastering TypeScript - 2023 Edition - Udemy Mar 2023
