Pritam Muli

Personal Summary

Experienced React and React Native Developer with a strong background in building dynamic web and mobile applications, real-time features, and seamless user interfaces. Skilled in JavaScript, Redux, Firebase, and RESTful API integration.

Experience

Tata Consultancy Services - React Native Developer

05/2024 - Current

JLR - Jaguar Land rover

Roles and Responsibilities.

- Improved shift scheduling efficiency by 40% through real-time system implementation.
- Reduced user drop-off by 25% by integrating seamless Google and multi-factor authentication.
- Enhanced app performance by 30% by implementing useMemo and useCallback effectively.
- Managed global state with Context to ensure consistent, real-time data synchronization across employee devices.

Tata Consultancy Services - ReactJS Developer

02/2023 - 04/2024

Ultimatix - TCS internal

Roles and Responsibilities

- Built multilingual support for 5+ languages using i18next, expanding product reach globally.
- Increased employee event engagement by 60% through real-time registration and notifications module.
- Reduced page load time by 35% with optimized React and Redux architecture.
- Improved data consistency across sessions with persistent local storage implementation.

Tata Consultancy Services - Front End Developer

12/2021 - 12/2022

Internet of Things Digital Engineering - TCS internal

- Ensured 100% cross-browser compatibility with rigorous CSS and JS validation.
- Implemented dynamic features like filtering, sorting, search, and form validation using vanilla JavaScript and AJAX for real-time updates.
- Built reusable UI components (product cards, modals, auth forms, etc.) and enhanced UX with interactive elements like image galleries and dropdowns.
