Professional Summary

Frontend developer with 3+ years of experience specializing in high-performance, user-centric web applications using ReactJS and NextJS. Proven track record in improving conversion rates through iterative UI optimization, scalable component architecture, and data-driven feature rollouts. Experienced in stakeholder collaboration, integrating analytics (GTM, Meta Pixel), and mentoring junior developers. Highly motivated, quick to learn new technologies and effective in cross-functional team environments.

Experience

ImpactGuru | *Mumbai, MH*
Software Engineer 2

May 2024 – Present

- Revamped Impactkart homepage and fundraiser page, introducing **custom donation** amounts, which led to a 28.1% increase in donation volume, conversion rate improvement from 6.88% to 9.17%, and 17.4% increase in CTA clicks.
- Optimized story pages by reducing initial load from **22s to 4s** through lazy loading, image compression, and deferred rendering of off-screen elements using MutationObserver.
- Utilized **Microsoft Clarity** to study user behavior and drop-off points; drove iterative enhancements to improve funnel performance.
- Achieved significant UX gains including a higher conversion rate and reduced bounce rates through continuous testing and rigorous deployment cycles.
- Implemented and managed **Google Tag Manager** and **Meta Pixel** integrations for accurate user tracking, event-based triggers and funnel analytics.
- Integrated Ayushman Bharat Health Account (ABHA) card creation on Carepalsecure insurance portal with a 3-step form using **NextJs**, **Tailwind CSS**, **Ant Design**, and **UIDAI APIs**.
- Designed and launched Start FR v4, a smarter fundraiser creation flow powered by LLM document parsing and disease-specific suggested fundraising amounts, improving lead quality and conversion likelihood.
- Regularly used **Microsoft Clarity**, **Google Tag Manager**, and **Meta Pixel** to analyze user behavior, define event triggers, and iterate features based on funnel performance.
- Mentored and led a team of 3–4 developers and interns, ensuring timely delivery and high code quality in fast-paced product cycles.

LTIMindtree(L&T group of company) | *Mumbai, MH*
Software Engineer 1

June 2022 – May 2024

- Developed and maintained scalable, client-facing dashboards using React and Redux, following a modular architecture for maintainability and reusability.
- Optimized performance by implementing React Window for virtualization and building reusable components, resulting in a 27% improvement in overall app performance.
- Collaborated with QA and backend teams to integrate **RESTful APIs** seamlessly and minimize production bugs through thorough testing and coordination.

Technologies

Languages: JavaScript, TypeScript, HTML, CSS, SCSS.

Libraries & Frameworks: ReactJS, NextJS, NodeJS, Bootstrap, Material-UI, Tailwind CSS, Redux, JQuery, AntD.

Tooling & Other Skills: Git/GitHub, REST APIs, JSON/AJAX, SEO, Google Tag Manager, Meta Pixel, Microsoft Clarity, Web Vitals, MutationObserver, Responsive Design, A/B Testing, Cross-browser Testing, Performance Optimization

Education

BE in Computer Science | **University of Mumbai**
GPA: 7.35/10

July 2018 – May 2022
