PROFESSIONAL EXPERIENCE

Pragati - Customer and Project Management System (Using Laravel)

Description:

Developed a comprehensive system to manage customer details, project information, and Statements of Work (SOW). The application allows for seamless allocation of employees to projects with configurable billable and non-billable status, as well as the ability to specify allocation percentages. Additionally, employees can fill in timesheets for accurate tracking of their work hours. The system is designed with role-based access control, ensuring that users have the appropriate permissions based on their designated roles.

Skills: PHP Laravel, MySql, JQuery, Javascript, HTML, CSS

VMS (Visitor Management System)(Using React, Django Python)

Description:

Developed a Client Visit and Meeting Scheduling application that helps businesses streamline the scheduling and management of client visits, meetings, and follow-ups. The application allows users to book, reschedule, and track client meetings, integrate with Google Calendar for seamless event management, and generate notifications for upcoming meetings and reminders.

Skills: ReactJS, Django Python, MySql , Google SSO, JWT Authentication, Chart.js, API Testing, Restful Web API Development

Global Affiliate System (Using Codeignitor)

Description:

Global Affiliate Zone is the place to learn affiliate marketing strategies. Through step-by-step education you'll learn proven marketing strategies taught by active marketers. Also, we can manage affiliate and funnels and you can create the courses, book appointments and schedule some training and purchase membership in this system.

Skills: Codeignitor, MySql, Javascript, Jquery, Ajax

TODAY'S CAMPAIGN (Using Core PHP)

Description:

This is email marketing site, which will help user to register himself to get newsletters, also

he can import contacts from gmail,hotmail and other services. User can also import his contacts manually

using csv files. User can publish newsletter on social media like facebook, twitter, etc. Features are like auto responses of mail, accounting, subscription for demanded users are included.

Skills: PHP, MySql, Javascript, JQuery, Ajax

Private Access Admin Portal (PEER) (Using Laravel)

Aim: To create a web application to attend medical surveys.

Responsibility: Development and Following Life cycle of Software Development.

Description:

In this application, there are 2 logins, Admin and participants. Admin has a role of creating different surveys as per the requirement. On the other side these surveys will be used by doctors, researchers, R&D department team to get the normal user data about particular disease, their daily nutrients, etc. At the end those data has been used collected and forwarded to government medical agencies to create new medicines or treatment.

Skills: HTML, CSS, PHP (Laravel), JavaScript, MySQL, Ajax, Spark API, SVN etc.

Product: EIMS

Description: This is the Employee Information Management system, this product helps organizations to manage employee details. In this product we are storing the employee all details. Project allocations, Manager allocations, Exit process etc. Also we have employee skills in this product we are using those skills to assign employees to new projects.
