

SUMMARY

Frontend Developer with over 2 years of experience specializing in developing and maintaining modern, scalable, and high-performance web applications using React.js, JavaScript (ES6+), HTML5, and CSS3. Proven success in optimizing UI/UX for enterprise applications in the storage and cybersecurity domain. Skilled in component-based architecture, cross-browser compatibility, responsive design, and integrating APIs. Strong knowledge of Redux, Hooks, Material UI, NPM, and RESTful services. Collaborative team player with experience working in Agile environments.

SKILLS

- **Languages:** JavaScript (ES6+), TypeScript (basic), Python, C++
- **Frontend:** React.js (Hooks, Context API, State Management, Component Architecture), Redux, Material UI, Tailwind CSS, amCharts5
- **Tooling & Testing:** Git, Webpack, NPM, Lighthouse, Chrome DevTools, React Testing Library, Jest (basic)
- **Backend & Integration:** Node.js, Express.js, Python, REST APIs
- **Databases:** MongoDB, SQL
- **Methodologies:** Agile (Scrum), CI/CD, Component-driven development, Version control
- **Others:** xterm.js, ssh2, Figma (basic), Jira

EXPERIENCE

Member of Technical Staff 2 Cohesity (formerly Veritas)

July 2023 - Present
Pune, India

- Own and maintain **OneUI**, the integrated UI platform for **NetBackup** and **NetBackup Flex Scale (NBFS)**, used by 500+ enterprise clients across global deployments.
- Manage stability, compatibility, and usability of OneUI by publishing shared **component libraries** via **NPM**, coordinating version upgrades, and resolving cross-product integration issues.
- Built a full-stack **Alert Resolution feature** for NBFS, involving both frontend (**React.js**) and backend (**Node.js**) logic, enabling users to dismiss or mark alerts as resolved — significantly improving alert accuracy and reducing noise from stale incidents.
- Designed and developed UI components using **React.js**, **Material UI**, and **JavaScript**, focused on scalability, accessibility (WCAG compliance), and performance optimization.
- Migrated core applications from **React 18 to React 19**, improving render performance and reducing technical debt across 50+ components.
- Replaced outdated charting library **amCharts4** with **amCharts5**, reducing load time and improving interactive visualization for dashboard features.
- Led the deprecation of a legacy internal design system (VDL) and standardized UI using **Material UI**, increasing developer velocity and cross-team consistency.
- Reduced UI-related bugs by 40% year-over-year through improved quality assurance, test coverage (manual + basic automated), and structured code reviews.
- Collaborated with **backend engineers**, **QA teams**, and **UX designers** in **Agile** sprints to deliver customer-facing features aligned with product goals.
- Technologies: **React.js**, **JavaScript**, **Material UI**, **Node.js**, **Python**, **REST APIs**, **NPM**, **amCharts5**

Undergraduate Intern Cohesity (formerly Veritas)

Jan 2023 - July 2023
Pune, India

- Created a web-based **SSH client** using **xterm.js** and **ssh2**, embedded within the **React.js**-based admin interface.
- Enabled users to manage and access remote servers through a secure, browser-accessible **terminal UI**.
- Developed full-stack integration of the SSH module using **Node.js** and **React.js**, improving operational efficiency and eliminating reliance on external tools.
- Enabled simultaneous multi-VM access via tabbed terminal interfaces, improving system administration workflows.
- Technologies: **React.js**, **Node.js**, **WebSocket**, **xterm.js**, **ssh2**

Frontend Intern Katonic.ai

Sept 2021 - Nov 2021
Remote

- Developed production-ready web interfaces for the company's **MLOps platform** using **React.js** and **Node.js**.
- Built UI components including the **App Store** and **Notebook Integration** interface.
- Improved the platform's responsiveness and visual consistency using **Tailwind CSS**.
- Contributed to deployment automation using **Docker** and collaborated with the backend team on **API integration**.
- Technologies: **React.js**, **Node.js**, **Tailwind CSS**, **Docker**

PROJECTS

Wedly ([Link](#))

October 2022

- Built using **React.js**, **Redux**, **Node.js**, **Express.js**, and **MongoDB**.
- Enabled users to create digital guest lists, generate WhatsApp-based invitations, send payment-based blessings via **Razorpay**, and automate event reminders.
- Developed role-based authentication using **Passport.js** and integrated **Redux** for global state management.
- Implemented responsive UI and mobile-first design for cross-device accessibility.

EDUCATION

B.Tech in Computer Engineering

2019-2023

International Institute of Information Technology, Bhubaneswar

CGPA: 8.8

AISSCE - Class 12th

2017-2019

LBS Senior Secondary School, New Delhi

Percentage- 90.8%

CERTIFICATIONS

- **Namaste React** – NamasteDev.com (Akshay Saini)
In-depth course on React.js fundamentals and advanced concepts including Hooks, Context API, JSX, Virtual DOM, reconciliation, and component architecture.
Completed in 2024
- **The Web Developer Bootcamp** – Udemy (Colt Steele)
Comprehensive full-stack course covering **HTML5**, **CSS3**, **JavaScript (ES6)**, **Node.js**, **Express.js**, **MongoDB**, and basic **React.js**.
Completed in 2020
