PROFESSIONAL EXPERIENCE

Systems Engineer (React Developer)

Tata Consultancy Services, Karnataka, India

May 2021 - Present

- Assisted in the development of web applications using **React JS** and **JavaScript**. Developed reusable components to streamline the development process
- Built and maintained UI components with React.js, focusing on efficient **DOM manipulation** and core principles.
- Managed state using **Redux** and integrated **RESTful APIs** for data handling
- Optimized app performance with tools like **Babel**, **Webpack**
- Secured data exchanges using **JWT** and ensured code quality with React Testing Library and Jest
- Used **Git** for version control and followed **ECMAScript** standards for clean, maintainable code
- Collaborated with cross-functional teams to meet project objectives and deliver high-quality frontend solutions.
- Contributed to the enhancement of user interfaces through continuous iteration and feedback integration

PERSONAL PROJECTS

- Cart Wish**
 - Cart wish is an e-commerce website developed using React JS and JavaScript and implemented product listings, user authentication, and shopping cart functionality optimized for performance and responsiveness. Used modern development practices, including component-based architecture
 - Technologies used** : HTML, CSS, Bootstrap, JavaScript, React JS
- Movie Maniac**
 - Movie Maniac is a dynamic web application designed to provide users with comprehensive information about movies, including ratings, reviews, trailers, and cast details. Implemented a responsive and interactive user interface using React, ensuring compatibility across various devices and screen sizes.
 - Technologies used** : HTML, CSS, Bootstrap, JavaScript, React JS

ACHEIVEMENTS

- Received the Elevate Wings Award from the Elevates team for completing the Google Cloud Practitioner course
- Won On The SPOT award for resolving the highest tickets without breaching the SLA.
- Won Applause for Team Award for exceptional teamwork and collaboration on a critical project that significantly improved operations
