Summary

Senior Software Engineer with 3+ years of experience in developing scalable web applications using React.js, TypeScript, and modern JavaScript frameworks. Achieved 40% performance improvements and 30% faster delivery through Agile methodologies and strategic cross-team collaboration. Expert in responsive design, UI/UX optimization, and translating business requirements into user-focused solutions. Proven leader in technical decision-making and stakeholder management with consistent track record of exceeding project goals. Drives measurable business impact through innovative frontend architecture and best practices implementation.

Skills

- HTML
- CSS (Styled-components, Tailwind, Bootstrap)
- JavaScript
- TypeScript
- React.js
- Next.js
- APIs: REST API, GraphQL, AJAX
- GitHub and GitLab
- UI/UX: Zeplin, Figma, Canvas

May 2022 - Present

Work Experience

Futops Technologies India Pvt Ltd

- Delivered 4+ interactive web applications for the Japanese government using React, JavaScript and TypeScript, boosting user engagement and improving consumer experience by 35%
- Mentored 3 junior developers on modern development best practices, resulting in improved code quality and increasing team efficiency by 30%.
- Collaborated with a team of 5 developers and designers to deliver pixel-perfect designs, ensuring 98% design accuracy using Zeplin.
- Designed multiple web pages for 2 client projects using Figma, adhering to specific requirements and contributing to a cohesive user interface.
- Managed version control using Git, with zero major code conflicts in over 500+ pull requests.
- Applied Agile methodologies across 4+ projects, ensuring on-time delivery with a 100% success rate in meeting project deadlines.

Projects

Live View Server (Real-time live streaming)

- Engineered Leaflet.js integration to support real-time mapping of 50K+ camera markers, optimizing rendering performance for seamless interaction and minimal lag.
- Refactored map clustering and rendering logic, enabling Leaflet to support over 1 million markers, improving large-scale visibility and user interaction by 60%.
- Supported an IndexedDB based caching mechanism to persist API data for 50K+ cameras, accelerating retrieval speeds by 45% and minimizing unnecessary network calls for the entire application.
- Provided DASH.js and HLS.js player support to enable real-time single-stream support for 50K+ cameras, enhancing system scalability and reducing video latency by 30%.
- Built secure role-based permission management system supporting admin and viewer roles, ensuring controlled multi-user access to live video streams across different browsers and tabs.
- Deployed live stream playback modules across multiple UI pages, maintaining consistent UX and reducing stream-loading errors by 25%.

Scorer Edge (Surveillance Management System)

- Led end-to-end frontend application development from concept to deployment, prioritizing performance optimization and user experience.
- Provided multi-stream support for USB, MLIT, Safie, and HLS cameras, enabling real-time video streaming on the user interface and improving system monitoring efficiency by 40%.
- Integrated WebSocket technology for real-time streaming of alerts, achieving latency of less than 1 second, enhancing platform responsiveness by 50%.
- Integrated Leaflet maps for real-time camera location tracking, improving monitoring capabilities and enhancing user interaction.
- Utilized Axios for full API lifecycle integration (GET, POST, PUT, PATCH, DELETE), improving data flow and reducing response errors by 25%.
- Developed a user management feature supporting multi-user access with secure login and permission controls, reducing onboarding friction by 20%.
- Enabled network configuration on NUC servers via both wlan0 (Wi-Fi) and eth0 (Ethernet) interfaces.
- Implemented Wi-Fi security settings for NUC server machines, including WPA-PSK, WPA2-PSK, and WEP protocols, enabling users to manage secure wireless configurations.
- Created multiple pages in Figma designs aligned with client requirements, improving UI consistency and cutting redesign time by 30%.

Education

Sept 2020 - Jun 2022

Master of Computer Applications

IICMR College Pune University

Wins and Awards

- Star Contributor Award of the Year (2023)
- Spot Award of the Month (Sep 2023)
- Helping Hand Of The Month (Mar 2023)
